Revised 6 Principles

1) *Price per Mbps Shall Not Increase.* The price per Mbps of the IP replacement product shall not exceed the price per Mbps of the TDM product that otherwise would have been used to provide comparable special access service at 50 Mbps or below.

2) *A Provider’s Wholesale Rates Shall Not Exceed Its Retail Rates.* An incumbent’s wholesale charges for the IP replacement product shall not exceed its retail rates for the equivalent offering.

3) *Basic Service Pricing Shall Not Increase.* The wholesale price of the service (including any discounts), including but not limited to wholesale voice service purchased under a UNE-P replacement commercial agreement and the lowest capacity level of special access service at or above the DS1 level shall not increase. For example, (1) the wholesale price for a single IP voice line shall not exceed the wholesale price for a single TDM voice line and (2) a 2 Mbps Ethernet price shall not exceed the DS1 price when 2 Mbps is the lowest Ethernet option available.

4) *Bandwidth Options Shall Not Be Reduced:* Wholesale bandwidth options must, at a minimum, include the options that the incumbent offers to its retail business service customers.

5) *No Backdoor Price Increases:* Price hikes shall not be effectuated via significant changes to charges for NNI or any other rate elements, lock-up provisions, ETFs, special construction charges, or any other measure.

6) *No Impairment of Service Delivery or Quality:* Service functionality and quality, OSS efficiency, and other elements affecting service quality shall be equivalent to, if not better than, what is provided for TDM inputs today. Installation intervals and other elements affecting service delivery shall be equivalent to, if not better than, what the incumbent delivers for its own or its affiliates’ operations.
