I dislike the idea of having fast and slow lanes. Keep the internet equal. This is ridiculous to do. It'll be like when Walmart got big and shut out all those small businesses, the only differences being, this is bigger, more severe, and will put a lot of people in the slow lane and monopolize. This is not helpful to anyone but the ones owning the communicating businesses that are in the "hyper speed lane". This will not create anything but trouble. Please do not pass.
