Washington, DC 20554

Re: Ex Parte Presentation
Amendment of the Commission’s Rules with Regard to Commercial Operations in the 3550-3650 MHz Band, WT Docket No. 12-354

On September 15, 2015, CTIA - The Wireless Association®, and representatives of member companies AT&T and Verizon met with representatives from the Wireless Telecommunications Bureau (“WTB”) and the Office of Engineering and Technology (“OET”) to discuss the above-referenced proceeding. A list of attendees is attached.

In the meeting, we discussed CTIA’s Petition for Reconsideration1 to provide Priority Access License (“PAL”) holders renewal expectancy, longer license terms, power limitations and the “N-1” auction process. Additionally, we discussed the amount and type of information derived from registered Citizens Band Radio Service Devices (“CBSDs”) and recommended that the Commission encourage that the multi-stakeholder group Wireless Innovation Forum2 determine a minimum set of information to be delivered to an external Spectrum Access System (“SAS”) to perform its functions. We further recommended that the Commission ensure that SAS operators internally cabin off any data from other portions of their respective business, and prohibit them from using this data for any purpose other than for operation of the SAS.

Pursuant to Section 1.1206 of the Commission’s rules, a copy of this letter is being filed in ECFS and emailed to the Commission participants. Please do not hesitate to contact the undersigned with any questions.

Sincerely,

/s/ Scott K. Bergmann
Vice President Regulatory Affairs
CTIA – The Wireless Association®
