I use Nomorobo on my Comcast line and it is wonderful. The crooks still create new numbers all the time but since using I have only 1 call maybe a week now instead of 10 per day. This company should be praised for their program and this is something that should be made available to all phone companies. This should be automatic instead of paying $3.50 a line to the FCC maybe you should help tax payers get this past. Start earning your money.
