Re: Ex Parte Notice: Terrestrial Use of the 2473-2495 MHz Band for Low-Power Mobile Broadband Networks – IB Docket No. 13-213

Dear Ms. Dortch:

On May 18, 2015, David Damast of York Capital Management, Lyman Delano of Beck, Mack & Oliver LLC, Dan Mattio of Vulcan Capital, Kyle Pickens of Steelhead Partners, LLC, Jamie Zimmerman of Litespeed Management, Steve Berman of Lawler, Metzger, Keeney & Logan, LLC, and I held separate meetings with Renee Gregory, Legal Advisor to Chairman Tom Wheeler; Commissioner Michael O’Rielly, Robin Colwell, Chief of Staff and Senior Legal Advisor to Commissioner O’Rielly, and Erin McGrath, Legal Advisor to Commissioner O’Rielly; Brendan Carr, Legal Advisor to Commissioner Ajit Pai; Priscilla Argeris, Senior Legal Advisor to Commissioner Jessica Rosenworcel; and Mindel De La Torre, Jose Albuquerque, Chip Fleming, Jennifer Gilsenan, Karl Kensinger, Lynne Montgomery, Sankar Persaud, and Troy Tanner of the International Bureau. Mr. Damast, Mr. Delano, Mr. Mattio, Mr. Pickens, and Ms. Zimmerman are representatives of investors in Globalstar, Inc. (“Globalstar”), a leading provider of mobile satellite service (“MSS”) in the Big LEO band.

At these meetings, we pointed out that since the deployment of its second-generation MSS constellation, Globalstar has experienced significant growth in its MSS business and expects demand for its satellite services to accelerate further after the completion of its second-generation ground infrastructure in 2016. We described Globalstar’s interest in using its spectrum more intensively for additional innovative services, and expressed support for the rules the Commission proposed in November 2013 to allow Globalstar to provide low-power terrestrial mobile broadband service (Terrestrial Low Power Service or “TLPS”) in its own licensed MSS spectrum at 2483.5-2495 MHz and adjacent, unlicensed spectrum at 2473-2483.5 MHz.1 We urged the Commission to adopt its proposed rules expeditiously to add 22 megahertz

to the nation’s wireless broadband spectrum inventory and ease the congestion that is diminishing the quality of Wi-Fi service at high-traffic 802.11 hotspots and other locations.

Pursuant to section 1.1206(b)(2) of the Commission’s rules, 47 C.F.R. § 1.1206(b)(2), this ex parte notification is being filed electronically for inclusion in the public record of the above-referenced proceeding.

Respectfully submitted,

/s/ Regina M. Keeney
