By the naming of this item it would seem that you do not want the regular citizens to understand what this item is about. By the date of 1934 it would seem that you are looking at an antiquated law to control a new entity. It was the phone system etc back in the day which stunted the growth and produced monopolies. Please do not apply this thinking to our unique and open world of the internet. It will be a mistake that we may not see now but in the future it may be very regretful. Please leave the internet alone. Thank You for your time.
