As a concerned citizen, I disagree with the rates being considered for Video Relay Service companies. Those rates would affect the quality and service that the companies provide causing the deaf community to suffer. As we all know American Sign Language is their primary mode of communication and VRS provides an excellent way for deaf people to communicate with the world around them. Yes VRS wouldn't cease to exist but major cut backs would occur. It would cause many people to be out of jobs all around the country when it is difficult to find jobs anywhere. Please reconsider your rates and if needed use the money from the funds collected for TTY relay services
