I strongly reject any move that negatively impacts Net Neutrality in favor of Communications Companies in an effort to manipulate everyone else. Narrowing equality and neutrality in any way will have a hugely negative impact on all but those who "Pay To Play" with the large Communications Providers, i.e. Comcast, AT&T, etc.

We, the public, already pay far too much for subpar services in comparison to the rest of the globe. It's time to put the brakes on Big Business' monopoly thereby ensuring that ALL Americans have access and are not bullied by a cadre of wealthy businessmen usurping our freedoms to communicate, start up businesses, choose and navigate.
