Tab 2 - Tribal PMQ

Tribal Government Pre-Meeting Questionnaire

Needs Assessment and Deployment Planning

What are the Tribe's communications goals, needs, and priorities, as well as what the Tribe intends to do with communications services?

What core community or anchor institutions are central to deployment and what in the nature and operations of these institutions is relevant to the need for communications services?

Are there economic factors and possibly Tribally-driven opportunities that will assist in making the business case for deployment on Tribal lands, as well as opportunities where Tribal governments and communications providers can partner.

ASTAC has an elected Director to our Board representing your community. All Directors receive industry training in telecommunications, meet four times yearly to set direction for the Cooperative and could potentially be a great resource in directing the Cooperative relative to your planning. Would you like the Director to speak for your tribal entity and engage the Cooperative management team on your behalf?
Feasibility and Sustainability Planning

Are there specific challenges associated with deploying and sustaining a communications network on your lands?

Many federal grant or loan programs provide direct access to, or particular standing for, Tribal Nations and their entities. That is, there are federal government programs that support infrastructure deployment and support the economic, health, safety, and welfare missions in Native communities. Are there any additional resources the Tribal entity may bring to bear in feasibility and sustainability planning for communications services?
Marketing Services in a Culturally Sensitive Manner

The Tribal engagement obligation provides Tribal governments and ASTAC with the opportunity to discuss and explore ways in which we can coordinate or partner to ensure that services are marketed in a manner that will relate directly to the community, resonate with consumers, and stimulate increased adoption of services on Tribal lands.

Would you be interested in developing materials, separately or jointly, specific to the Tribal community?

Would you like to review and comment on our marketing materials as part of the development process?

What other elements of our respective organizations may need to be engaged? For Tribal governments, this may mean administrative planning, community service, and other governmental offices. For ASTAC, this may mean customer service, technical assistance, and commercial business divisions.
Rights of Way and Other Permitting and Review Processes

There are numerous regulatory processes with which ASTAC must comply in order to provide communications services on Tribal lands, including rights of way, land use permitting, facilities siting, and environmental and cultural review processes.

Are there additional regulatory processes beyond those practiced and disclosed by ASTAC that should be incorporated in serving Tribal lands?
Compliance with Tribal Business and Licensing Requirements

As sovereign institutions, Tribal governments have the authority to impose Tribal business and licensing requirements on all entities doing business on their lands. The form of these licenses vary greatly, including certificates of public convenience and necessity, Tribal business licenses, master licenses, and other related forms of Tribal government licensure.

Please provide a comprehensive list of any business and licensing requirements applicable to the provision of the cooperative's communications services, including an explanation of precisely what all such requirements entail, specific application procedures and timeframes, as well as the governmental offices involved in the licensing process. As part of this process, ASTAC will provide you with a list of existing licenses in place, as applicable.

Chief Services Officer's Report

She reminded the board that in light of the cooperative's tribal engagement responsibilities, marketing efforts were focused on the cultural sensitivities and traditional activities undertaken in the cooperative's service areas. With that background, she reported that July marketing activities included distribution of information regarding flex plans, the availability of the Samsung Galaxy S5 cellular telephone and the rollout of the new webmail system. Activities for August included the installation of a new lighted sign on the Barrow sales office, refreshment of the logo and ASTAC brand and the preparation of sports posters for the upcoming sports season. September activities included preparation of the 2015 calendar and telephone directory, the village SWOOSH promotion in six of the nine service areas, installation of mission and vision plaques in the office and the preparation of additional sports-related ads.

The board expressed its approval to both the ongoing and proposed marketing efforts described by Jodi Forsland and she was thanked for her report.

Chief Network Officer's Report

He indicated that the network department, in an effort to satisfy ongoing needs assessment and deployment planning for communication services in the cooperative service areas, undertook a number of plant-related activities during the third quarter.
He also reported on recent Quintillion efforts to begin installation of shore-based facilities to support the planned undersea fiber optic cable project. The board expressed approval of the plant department's ongoing assessment and deployment efforts and thanked Mr. Carpenter for his report.

Tribal Engagement Committee Report

President Aiken asked Steve Merriam to provide the committee report.

Mr. Merriam reminded the board that the FCC and related entities had issued further guidance on tribal government engagement obligations of telecommunications carriers in a release dated July 19, 2012. In compliance with the requirements of the guidance, the cooperative developed an ongoing strategy for needs assessment and deployment planning, feasibility and sustainability planning, the marketing of services in a culturally sensitive matter, compliance with tribal rights of way and other permitting processes, and compliance with tribal business and licensing requirements. He indicated that each department of the cooperative now focus its efforts with respect to these matters.

Steve Merriam also reported that the cooperative had identified ten tribal entities that exist within the cooperative's service area. He indicated that an effort was made, initially in person, and later by correspondence, to contact each group individually to initiate the needs assessment process. As a result of meetings with a number of the tribal entities, it was determined that the best method of interaction with the tribal entities was for each entity to appoint the board.
member responsible for the service area in which the tribal entity was located as its primary point of contact with the cooperative. And that way, the board member could communicate the ongoing activities of the cooperative to the tribal entities which, in turn, would communicate tribal entity needs to the cooperative. Mr. Merriam indicated that to date, he received letters approving this mode of interaction from five of the ten tribal entities. He indicated that efforts were underway to determine whether this plan of attack would work with the remaining entities. He also asked the Board members in these communities to reach out to the remaining five tribal entities that have not responded to numerous attempts to engage and start that dialogue. The responsible Directors unanimously agreed to do so.

RESOLUTION 2014-06
REDACTED FOR PUBLIC INSPECTION

RESOLUTION 2014-07

[Redacted text]
December 10, 2014

Mr. Howard Patkotak, President
Village of Wainwright
P.O. Box 143
Wainwright, AK 99782

Dear Mr. Patkotak:

This letter is intended to help facilitate engagement between Tribal government officials and ASTAC, which provides service on Tribal lands with the use of Universal Service Fund (USF) support. In 2012, ASTAC met with all tribal entities on the North Slope. Based on feedback we received from Tribal leadership, we are amending our process to better collaborate with you.

A number of tribal entities pointed out that ASTAC has an elected Director to our Board representing your community. All Directors receive extensive industry training in telecommunications, meet four times yearly to set direction for the Cooperative and could potentially be a great resource in directing the Cooperative relative to your planning. It was highly suggested that the Director coordinate with you and speak for your tribal entity, engaging the Cooperative management team on your behalf. This would be much more responsive to your evolving needs due to the quarterly standing Board meetings where you could be represented. It would also save the membership a significant amount of money. For instance, in-person tribal engagement in 2012 cost the Cooperative almost $28,000. Five of the ten tribal entities for the North Slope have adopted this approach in 2013, saving the membership significant money better used to upgrade the network for future offerings.

If this alternative approach makes sense to you, please email me at steve@astac.net and confirm your interest in using our Board member as your organization’s representative for telecommunications issues, and we will take it from there. Thanks for your consideration of this tailored approach.

Best Regards,

Stephen Marriam, CEO

ASTAC, Serving the North Slope of Alaska since 1980

Dear Charlie,

I am writing this letter in response to ASTAC's request that the Native Village of Barrow designate ASTAC's elected board member from Barrow as our representative for telecommunications issues. I do support this alternative approach to tribal engagement as a means of getting the necessary input in the most cost-effective manner with representation from the most knowledgeable and qualified member of our community. You may contact me at (907) 852-4411 if you have any questions.

Cordially,
