RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

Our organization provides important services including classes for adults, youth programs and health services to the Latino community in Lancaster. Over the past years, we have found a true friend in Comcast, a company that clearly understands the need for bilingual outreach and programs.

Americans today, especially in the Latino community, need to focus on keeping up with new technologies. It is no secret that a digital divide continues to exist in which too many of us still don't understand how to use or benefit from the Internet. Comcast is now working with us on our Community Tech Center and Bilingual Development Program to make certain that members of our community develop the necessary computer and Internet skills that will help them find high quality twenty-first century jobs.

Comcast also has helped provide Spanish language television to the Lancaster area. These channels provide a valuable linguistic and cultural bridge for the Latino community and is further evidence that Comcast is a company that understands that America is like a **quilt**—many colors, many sizes, all woven together.

List ABCDE

It's reassuring that Comcast not only realizes that we need to end the digital divide but is creating innovative initiatives to see this effort through to completion. Based on our experience we believe Comcast proposed transaction with NBC Universal will result in even more opportunities for community involvement and technological development.

Sincerely,

A handwritten signature in black ink, appearing to read 'Carlos Graupera', written in a cursive style.

Carlos Graupera
