This will lead to fewer competition and too much power for one media giant. Cable and internet prices have steadily climbed year after year and NOT gone down. Bundling prices has only led to fewer choices and higher prices. This could also limit free spee

We need separation of media. We need independence of media. We need for all voices to be heard. None of this will happen if massive mergers happen. Save America. Keep media free.

Comcast does not "play" nice when it comes to consumers....you get the "come on" with packages, but then get slapped with "extras" in fees, as well as having to get lots of useless channels. Also, they have not been able to keep up with the demand with th

Consolidation of the news/entertainment industry is now complete. Don't let the corporate behemoths get an iron grip on the gateways to the Internet too.

It would impede the flow of information to the public...we already have way to much 'spoon-fed' information. It's a violation or monopoly rules-Another to big to fail, looking for a future hand out which would further indebt the American public to China.

I do not want us to not be able to afford the channels listed above, and I don't want to lose the ability to watch great masterpieces of sci fi on youtube because of this takeover of NBC. That would be a travesty, there are quite a few movies that are chu

Fear that they will restrict programming options by active access management or limiting bandwidth from outside information sources, or by charging additonal fees for access to information outside their network.

There is such a thing as TOO BIG, Comcast has already controled so much of the cable industry , promising lower rates , but never delivering. Now they can monopolize both Internet and television ? NOT a goo idea.

Victoria Singer

Market monopoly: that's why we have Anti-Trust laws. The more giant corporations we have, the harder it is for smaller businesses to grow and thrive. Go, Smaller!

Comcast is not available in rural areas. Most people have satellite service. The merger could cause unavailability or higher pricing to non-comast users of NBC. Monopoly.

Susan Evans

Spokane Valley, WA 99037

A Comcast merger would only be good for Comcast, not consumers. Comcast does not need more power, which would allow more price gouging and restrictions. Please do not approve this merger.
