Re: *Global Crossing Limited and Level 3 Communications Inc., Application for Consent to Transfer Control of Authority to Provide Global Facilities-Based and Global Resale International Telecommunications Services and of Domestic Common Carrier Transmission Lines, Pursuant to Section 214 of the Communications Act, as Amended, IB Docket No. 11-78*

Dear Ms. Dortch:

In response to a question from staff, Level 3 provides the following information with respect to the information it filed in its ex parte letter of September 16, 2011, as corrected on September 19, 2011. In that ex parte, Level 3 stated that, of a total of 37 entities with which the combined Level 3 and Global Crossing have peering relationships, 20 provide transit service in North America, based on BGP route announcements and Level 3's commercial experience.¹ Of those 37, 21 have peering relationships with Level 3 pre-transaction; of those 21, 11 provide transit service in North America.

Sincerely,

John T. Nakahata
Counsel to Level 3 Communications, LLC

cc: Tim Stelzig
Brian Murray

¹ A transit provider would be an entity that provides internet transit service to enterprise and/or wholesale customers.
