FCC KDB 247228 DR01-41733I SAR Testing Diagram

802.11 Configuration

802.11 mode & BW selection based on target WIFI power only

WIFI Channel Selection

Channel selection for each "configuration" based on measured output power and SAR

SAR Test Position(s)

SAR test position is required for all positions (for each exposure condition) if closest antenna coupling-phantom distance is indeterminate

802.11 Test "Configuration" SAR Test Position's i.e., 802.11ac-VHT20, 802.11a-HT20, WIFI Channel Selection per WII bang 802.11n-HT20, 802.11n-HT40, 802.11 Test Configuration Selection process etc. NIIZA 5 GHz 802.11 SAR Test "Position" i.e. Right Tilt, Left Edge, etc.
