PR-USVI Application Form 5634 Schedule B
Formatting Information

| Field | Description | Type | Example |
| :---: | :---: | :---: | :---: |
| Proposal Price | The total amount of annual support an applicant is willing to receive in a specified geographic area. The amount represents the total amount per year of support the applicant is willing to receive to provide service to all locations in the geographic area. The amount should be specified as a whole number (no decimals). <br> This amount must be equal to or less than the reserve price. In addition, the amount must be greater than one percent of the reserve price for a given area. | Whole number | 1702393 |
| Performance Tier (changed from Speed Tier) | Code for category of speed and monthly usage allowance the applicant will make available in a specified geographic area. Acceptable codes for this section are: <br> $1=$ Service with a speed $\geq 1 \mathrm{Gbps} / 500 \mathrm{Mbps}$ and a monthly usage allowance $\geq 2 \mathrm{~TB}$ $2=$ Service with a speed $\geq 100 / 20 \mathrm{Mbps}$ and a monthly usage allowance $\geq 2 \mathrm{~TB}$ $3=$ Service with a speed $\geq 25 / 3 \mathrm{Mbps}$ and a monthly usage allowance $\geq 200 \mathrm{~GB}$ | List value | 1 |
| Latency | Code for category of network latency the applicant will make available in a specified geographic area. Acceptable codes for this section are: $\begin{aligned} & 1=\text { Low latency of } \leq 100 \mathrm{~ms} \\ & 2=\text { High latency of } \leq 750 \mathrm{~ms} \end{aligned}$ | List value | 1 |
| Terrestrial Network Miles |  |  |  |
| Buried Fiber | Total amount of network miles within the specified geographic area consisting of buried fiber or similarly capable network plant. This amount should reflect the total amount of linear miles compromising the applicant's network measured from point-to-point between network facilities. <br> The amount of network miles should be specified as a number up to two decimal places. This amount of network miles can be zero if the applicant's network does not contain any buried fiber. | 2-decimal number | 1234.56 |

| Aerial Wireline (Standard Poles) | Total amount of network miles within the specified <br> geographic area consisting of aerial fiber or similarly <br> capable network plant using traditional wooden or non- <br> reinforced poles. This amount should reflect the total <br> amount of linear miles compromising the applicant's <br> network measured from point-to-point between network <br> facilities. | 2-decimal <br> number | 567.32 |
| :--- | :--- | :--- | :--- |
| The amount should be specified as a number up to two |  |  |  |
| decimal places. This amount can be zero if the applicant's |  |  |  |
| network does not contain any aerial cables using non- |  |  |  |
| reinforced poles. |  |  |  |$\quad$| Total amount of network miles within the specified |
| :--- |
| geographic area consisting of aerial fiber or similarly |
| capable network plant using high-wind rated or reinforced |
| composite poles. This amount should reflect the total |
| amount of linear miles compromising the applicant's |
| network measured from point-to-point between network |
| facilities. |$\quad$| 2-decimal |
| :--- |
| Fixeline (Composite Poles) |
| The Wireless |

| Network Miles with Redundancy or Backup | Of the total amount of network miles within the specified geographic area (from the field above), the number of miles with network redundancy or backup. This amount should reflect linear miles in the applicant's network measured from point-to-point between network facilities. <br> The amount should be specified as a number up to two decimal places. This amount can be zero if the applicant's network does not contain any network redundancy or path diversity. | 2-decimal number | 160.5 |
| :---: | :---: | :---: | :---: |
| Satellite |  |  |  |
| Number of Locations Served by Satellite | Total amount of locations within the specified geographic area that are or will be served satellite service. <br> This amount should be equal to or less than the total number of locations for the specified geographic area. This amount can be zero if the applicant does not intend to use satellite services. | Whole number | 144022 |
| Number of Locations Served by Backup | Of the total number of locations in the geographic area served or to be served by satellite, the number that are or will be served by a backup network. <br> This amount should be equal to or less than the total number of satellite locations the applicant specified for the geographic area. This amount can be zero if the applicant does not have a backup network for its satellite locations. | Whole number | 144022 |

| $\begin{array}{\|c\|} \hline \text { Geographic } \\ \text { Area } \\ \text { Number } \end{array}$ | Geographic Area (Municipio) | Locations | Annual Reserve Price (\$) | $\begin{gathered} \text { Proposal Price } \\ (\$) \end{gathered}$ | Performance Tier Code | Latency <br> Tier Code | Terrestrial Network (in miles) |  |  |  |  |  | Number of Total Network Miles with Redundancy or Backup | Satellite |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | Buried Fiber | Aerial Wireline (Standard Poles) | Aerial Wireline (Composite Poles) | Fixed Wireless | $\begin{gathered} \text { Total } \\ \text { (enter) } \\ \hline \end{gathered}$ | $\begin{gathered} \text { TOTAL } \\ \text { (calculated) } \end{gathered}$ |  | Number of Locations Served by Satellite | Number of Locations Served by Backup |
