Released: December 23, 2021

## WIRELINE COMPETITION BUREAU ANNOUNCES PERFORMANCE OBLIGATIONS FOR RATE-OF-RETURN ALASKA PLAN RECIPIENTS AFTER THE MIDTERM REVIEW

**WC Docket No. 10-90**  
**WC Docket No. 16-271**

On August 23, 2016, the Federal Communications Commission (Commission) adopted the *Alaska Plan Order*.<sup>1</sup> In the *Alaska Plan Order*, the Commission provided a one-time opportunity for Alaskan rate-of-return carriers to elect to receive support frozen at adjusted 2011 levels for a 10-year term from 2016 until 2026 in exchange for meeting individualized performance obligations—offering voice and broadband services meeting specific service obligations at specified minimum speeds by five-year and 10-year service milestones to a specified number of locations.

The Commission also directed the Wireline Competition Bureau (Bureau) “to reassess the deployment obligations in the approved performance plans before the end of the fifth year of support,” that is, 2021, and required that “participating carriers update their end-of-term commitments no later than the end of the fourth year of support.”<sup>2</sup> The Commission further delegated to “the Bureau the authority to review and approve modifications that serve the public interest.”<sup>3</sup>

After reviewing the participants’ end-of-term commitments, annual location filings, and middle-mile map submissions, the Bureau approves the performance obligations in Appendix A. Appendix B to this public notice provides the minimum number of locations to be reported in the High-Cost Universal Broadband portal, or HUBB, i.e., newly deployed and upgraded locations over the term of the Alaska Plan,<sup>4</sup> by speed and middle-mile at the five-year and 10-year service milestones.

For purposes of administrative convenience to allow the Universal Service Administrative Company (USAC) sufficient time to make modifications to the HUBB to account for revised commitments at speed tiers not yet available to report,<sup>5</sup> on our own motion we waive the March 1, 2022 deadline for annual location reporting for rate-of-return Alaska Plan participants Adak Telephone Utility

---

<sup>1</sup> *Connect America Fund, et al.*, WC Docket No. 10-90 et al., Report and Order and Further Notice of Proposed Rulemaking, 31 FCC Rcd 10139 (2016) (*Alaska Plan Order*).

<sup>2</sup> *Id.* at 10158, para. 61

<sup>3</sup> *Id.* Carriers with approved plans to maintain existing levels service are subject to biennial review. *See Alaska Plan Order*, 31 FCC Rcd at 10158, para. 62. This midterm review also encompasses the Bureau’s biennial review.

<sup>4</sup> 47 CFR § 54.316(a)(5).

<sup>5</sup> *See* Universal Service Administrative Company, High Cost Universal Broadband (HUBB) Data Formatting Instructions, <https://www.usac.org/wp-content/uploads/high-cost/documents/Tools/HUBBDataFormatting.pdf>, at 16-17 (Revised April 2021) (not available to report 2/1 (satellite), 25/5 (microwave/fiber), 25/5 (fiber), or 100/20 (fiber)).

(Adak) (SAC 610989), Arctic Slope Telephone Cooperative (ASTAC) (SAC 613001), and Matanuska Telephone Association (MTA) (SAC 613015).<sup>6</sup> Once USAC has made the needed modifications to the HUBB so that it can collect the information, the Bureau will announce a new deadline. These three rate-of-return Alaska Plan participants are still required to certify compliance with their respective five-year milestones by March 1, 2022<sup>7</sup> and file updated middle-mile maps also by March 1, 2022.<sup>8</sup>

For additional information on this proceeding, contact Jesse Jachman, [jesse.jachman@fcc.gov](mailto:jesse.jachman@fcc.gov) of the Wireline Competition Bureau, (202) 418-2668.

<sup>6</sup> 47 CFR § 54.316(c). *See also* 47 CFR § 1.3 and *Connect America Fund; ETC Annual Reports and Certifications*, WC Docket Nos. 10-90, 14-58, 35 FCC Rcd 6543 (WCB 2020) (extending a filing deadline to allow USAC time to make updates to an online filing system). For performance measures testing, the Bureau and USAC will develop a timeline for Adak, ASTAC, and MTA to test at these new speeds, 2/1 Mbps, 25/5 Mbps, and 100/20 Mbps, as the speed tiers become available in the Performance Measures Module (PMM). In the meantime, ASTAC and MTA shall continue testing their existing samples at the previously committed speed tiers, 10/1 Mbps and 100/5 Mbps respectively. With Adak now having committed to new deployment, it will start performance measures testing for the first time at the 2/1 Mbps speed tier. *See Connect America Fund*, WC Docket No. 10-90, Order on Reconsideration, 34 FCC Rcd 10109, 10143-44, paras. 93-94 (2019).

<sup>7</sup> *See* 47 CFR § 54.316(b)(6).

<sup>8</sup> *See* 47 CFR § 54.316(a)(6), (c)(1).

Note 3: Year 1 is 2017

Note 4: Adak Telephone Utility's is At and Above Benchmark

Narrative: Forward looking cost to maintain the plant and to continue to seek better backhaul options as customers come online. As is, the current funding limits our ability to allow a better level of performance.

Our long term goal is to meet the ACAM requirements and secure additional funding to allow urban benchmark speed.

Adak Telephone Utility requested ACAM and was placed in the AK Plan

**Arctic Slope Telephone Cooperative<sup>2</sup>**

	Note 1	Note 2		Note 3				Note 3	
	Speed to End User	Locations Passed 1/1/15	Locations Passed 1/1/18	Number of Locations At Benchmark 1/1/18	Percent of Locations At Benchmark 1/1/18	Number of Locations At Benchmark Year 5	Percent of Locations At Benchmark Year 5	Number of Locations At Benchmark Year 10	Percent of Locations At Benchmark Year 10
Middle Mile Facility									
Satellite	1Mb/384k	2,509	398	398	100%	398	100%	398	100%
Hybrid Microwave-Fiber	4Mb/1Mb	206							
Hybrid Microwave-Fiber**	10Mb/1Mb		161	161	100%				
Hybrid Microwave-Fiber***	25Mb/5Mb					161	100%	161	100%
Fiber**	10Mb/1Mb		2,156	2,156	100%

Total		2,715	2,715	2,715		2,715		2,715	

Note 1: Residential speeds. (Initial Filing Note) In Fiber and Hybrid fed markets, ASTAC offers a 10/1Mbps best effort service with a \$24.99/Mo access fee and metered usage (\$2 per GB used up to 100 GB, \$1 per GB after 101 GB and up). In the Satellite fed markets, ASTAC offers best effort speeds up to 1Mbps/384kbps service, including unlimited usage. ASTAC will update the Commission when our product offerings improve, triggered by improved economics\*\* on the middle mile service.

Note 2: Residential and estimated business locations passed in ETC's network as of 12/31/15.

Note 3: Year 1 is 2017

\*\* ASTAC's last mile (FTTH) network is capable of delivering higher broadband speeds in all markets than what is offered, but is limited by middle mile network cost/capacity constraints. ASTAC is able to meet the latency requirements in those markets connected by Fiber and Hybrid Microwave-Fiber middle mile. ASTAC has demonstrated why the reasonably comparable rate requirement and delivered speed metrics are not feasible in any of its markets with use of a simple economic model. We can show that the prohibitive factor continues to be the high cost of middle mile transport.

\*\*\* ASTAC was able to renegotiate a lower rate on middle mile capacity (Asymmetric) which enabled a new 25/5 Mbps service launch in January, 2021. Upload speeds were also improved in all fiber-fed markets.

<sup>1</sup> See Letter from Andila Weaver, Vice President, Adak Telephone Utility, LLC, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Jan. 8, 2021); Letter from Andila Weaver, Vice President, Adak Telephone Utility, LLC, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Jan. 21, 2021).

<sup>2</sup> See Letter from Jeffry H. Smith VP of Public Policy and Advocacy, Vantage Point, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Dec. 22, 2020) (Arctic Slope Telephone Cooperative); Letter from Jeffry H. Smith VP of Public Policy and Advocacy, Vantage Point, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Sept. 27, 2021) (Arctic Slope Telephone Cooperative).

Microwave	10Mb / 1Mb					
Fiber	10Mb / 1Mb				1037	99%
Fiber	25Mb / 3Mb				10	90%

Note 1: Residential speeds

Note 2: Locations passed in ILEC's network as of 12/31/2015

Bristol Bay Telephone Cooperative's last mile network can deliver higher broadband speeds but has been limited by the middle mile network. BBTC is currently constructing a new middle mile 11GHz microwave system to replace the inadequate 6GHz microwave system that has an estimated turnup date of March 2022. This system when complete will improve data cap restrictions as well as speeds to our broad band customers. BBTC is currently pursuing year 2021/2022 funding opportunities through USDA Reconnect Program "and other programs" to replace 11GHz microwave middle mile with Fiber Optic Facilities that will again increase both speed and capacity.

**Bush-Tell Inc.<sup>4</sup>**

	Note 1	Note 2				
Middle Mile Facility	Speed to End User	Locations Passed 12/31/2015	Locations At Benchmark 12/31/2015	Locations At Benchmark Year 5	Locations At Benchmark Year 10	
Satellite	1Mb/256k					
Microwave	6Mb/1Mb	1,109	83%	83%	83%	
Fiber	10Mb/1Mb					
Fiber	25Mb/3Mb					

Note 1: Residential speeds.

Note 2: Locations passed in ILEC's network as of 12/31/2015.

Note 3: Year 1 is 2017

Bush-Tell Inc's last mile network is capable of delivering higher broadband speeds but is limited by the middle mile network. We will continue to upgrade our last mile network with fiber deployment and are prepared to offer higher speeds to end users when middle mile availability permits.

Bush-Tell will start deploying fiber farther into the network to decrease loop lengths. Bush-Tell's largest community will be deployed first which will take approximately 5 years to complete. Once this build-out is completed we will start deploying fiber throughout the rest of our service area. This fiber build-out will allow Bush-Tell to easily deploy fiber to the premise in the future and will also place Bush-Tell in a position to provide faster broadband offerings as middle mile rates and availability improve.

Villages within Bush-Tell's Study Area are between 71 and 185 miles from the nearest Middle Mile Facilities (Aniak - 92, Anvik - 130, Crooked Creek - 120, Grayling - 156, Holy Cross - 117, Kalskag - 71, Red Devil - 162, Shageluk - 149, Sleetmute - 165 and Stony River - 185). The cost to reach and utilize these facilities is so cost prohibitive Bush-Tell is currently reselling the services of the utility that owns the middle mile in question. Without this arrangement Bush-Tell would not be deploying broadband in any of our exchanges. Rates are assumed to be \$328.99 and include 100GB of usage allowance as of November 21, 2016. Rates are expected to increase a minimal amount once 150GB usage allowance is offered. When cost and/or capacity of middle mile changes, rates and usage allowances will be re-evaluated and adjusted as appropriate.

Bush-Tell will continue to investigate alternative options to access middle mile as they become available.

<sup>3</sup> See Letter from Earl Hubb, Bristol Bay Telephone Cooperative, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Dec. 10, 2021).

<sup>4</sup> See Letter from Roy Wrazen, General Manager, Bush-Tell, Inc., to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271 (Jan.11, 2021); Letter from Christine O'Connor, Executive Director, Alaska Telephone Association, to Marlene Dortch, Secretary, FCC, WC Docket No. 16-271, at 2 (Nov. 22, 2016).

Fiber	25Mb/3Mb				

Note 1: Residential speeds.

Note 2: Locations passed in ILEC's network as of 12/31/2015.

Note 3: Year 1 is 2017.

Circle Telephone & Electric, LLC's wire center does not have the facilities in place to provide broadband services. CTE has no terrestrial backhaul. The nearest terrestrial backhaul is located 155 miles away. The cost of satellite backhaul is too great for the small community to bear. CTE does not plan to develop or purchase middle mile transport or to deploy broadband until the cost of those facilities changes significantly.

Copper Valley Telephone<sup>6</sup>

Carrier	Study Area Code	Backhaul	Speed	Base Locations	% At or Above Benchmark 01/01/17	% At or Above Benchmark Year 5 12/31/21	% At or Above Benchmark Year 10 12/31/26

Note 3: Due to high cost of middle mile transport, broadband speeds are not affordable to most of OTZ's customers.

Note 4: Year 1 is the year funding under the AIF begins

OTZ Telephone Cooperative's last mile network as of 12/31/2015 is capable of delivering broadband speeds of 4Mb/1Mb and OTZ currently has a 6Mb/1Mb package available to customers. However, Due to the high cost of middle mile transport, both the 4Mb/1 and 6Mb/1Mb package are beyond the financial reach of most residential customers.

OTZ Telephone Cooperative is committed to offering the best possible communication service to its members and will continue to upgrade the last mile network, by replacing aging copper plant with fiber and upgrading core electronics to support fiber to the home.

OTZ plans on replacing all aging Dslams with VDSL capable Dslams.

For multi family dwellings (larger apartment building) OTZ plans to install fiber fed VDSL Dslams in the apartment buildings communication room. With this model OTZ will be able to mitigate the negative impact of category 3 wiring that is embedded in older apartment buildings.
