Telecommunications Industry Revenues

This report provides an overview of U.S. telecommunications industry revenues and contributions to the universal service support mechanisms over the past decade.¹ It updates our report that was released in September 2010.² Most of the new data, for 2009, are based on April 1, 2010 filings of the annual Telecommunications Reporting Worksheet (FCC Form 499-A). Preliminary 2010 data presented in Table 1, and the preliminary 2010 and 2011 shares of universal service contributions by principal type of contributor presented in Table 10, are based on filings of the quarterly Telecommunications Reporting Worksheet (FCC Form 499-Q).³

Virtually all telecommunications carriers providing interstate telecommunications services in the United States (to either domestic or foreign points) and certain other providers of interstate telecommunications, including interconnected Voice over Internet Protocol (interconnected VoIP) service providers, must report the information that is summarized in this report.⁴ Reported information includes revenues from regulated telecommunications offerings, non-regulated telecommunications offerings, and services that are not telecommunications.

Because contributions to the universal service support mechanisms are generally based on end-user (retail) interstate telecommunications revenues, the report distinguishes between end-user telecommunications revenues and carrier's carrier (wholesale) telecommunications revenues, and it distinguishes between interstate (including international) and intrastate revenues.⁵ The revenues that are considered non-telecommunications revenues in this context, such as from Internet access service or other

¹ Revenue data summarized in this report are used to calculate and assess any necessary contributions to fund universal service (USF), interstate telecommunications relay services (TRS), the administration of the North American Numbering Plan (NANPA), and the shared costs of local number portability administration (LNPA). They are also used to calculate and assess interstate telecommunications service provider (ITSP) regulatory fees. Commission rules prohibit program administrators from releasing the company-specific revenue data to the public.

² See *Telecommunications Industry Revenues: 2008*, available at <http://www.fcc.gov/wcb/iatd/lec.html>.

³ Summarized quarterly data are available at <http://www.fcc.gov/wcb/iatd/lec.html>. The quarterly data, which are far less detailed than the annual data, do not include the service-level detail that is available in the annual data.

⁴ Terms have specific meanings in the context of this report. "Telecommunications" means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received. (47 U.S.C. § 153(43).) "Interstate telecommunications" includes, but is not limited to, the following types of services: wireless telephony, including cellular and personal communications services (PCS); paging and messaging services; dispatch and operator services; mobile radio services; access to interexchange service (which is provided by all incumbent and competitive local exchange carriers); special access; wide area telecommunications services (WATS); subscriber toll-free and 900 services; message telephone services (MTS); private line; telex; telegraph; video services; satellite services; resale services; Frame Relay services; asynchronous transfer mode (ATM) services; Multi-Protocol Label Switching (MPLS) services; audio bridging services; and interconnected VoIP services. No exemptions exist for data or non-voice services. See 2011 FCC Form 499-A Instructions (*499-A Instructions*), section II.A ("Who must file"), available at <http://www.fcc.gov/formpage.html>, for additional information.

⁵ (Domestic) interstate revenues and international revenues are separately identified in some tables of the report.

information services, customer premises equipment (CPE) sales, inside wiring maintenance, published directories, or cable or direct broadcast satellite (DBS) services, are not discussed in detail in the report.⁶

In 2009, the industry reported \$281 billion in telecommunications service revenues, a decrease of 5% from 2008's \$297 billion. The \$281 billion includes revenues from interstate (including international) and intrastate services, and from end-user and carrier's carrier services. It includes revenues from all the major service categories: toll ("long distance") service, which primarily is reported by providers who use wired networks;⁷ local service, which also is primarily reported by wireline carriers; and mobile wireless service. Details of the data include:

- Total (carrier's carrier and end-user) toll service revenues decreased about 8% during 2009, from \$61 billion to \$56 billion. End-user toll service revenues decreased about 9%, from \$47 billion to \$43 billion. See Table 1.
- Filers reported \$107 billion of total (carrier's carrier and end-user) local service revenues for 2009, about 4% less than the \$112 billion reported for 2008. End-user local service revenues decreased about 6% during 2009, from \$73 billion to \$68 billion. See Table 1.
- Total (carrier's carrier and end-user) mobile wireless service revenues fell by 5% between 2008 and 2009, from \$124 billion to \$118 billion, and the end-user services component fell by 4%, from \$119 billion to \$114 billion. See Table 1. This reverses a long-standing trend. However, when non-telecommunications revenues such as CPE sales and Internet service are included, total revenues of providers whose principal business activity is mobile wireless service held steady at about \$187 billion. See Table 8.
- Total (carrier's carrier and end-user) telecommunications revenues for incumbent local exchange carriers (ILECs) decreased to \$83 billion in 2009, down 7% from \$90 billion in 2008. See Table 3. These carriers reported \$49 billion of fixed local service end-user revenue in 2009. See Table 8. This is about 10% lower than the \$54 billion they had reported for 2008.
- Non-ILEC providers of local services, including competitive local exchange carriers (CLECs), interconnected VoIP service providers, and, to a much lesser extent, toll carriers and mobile wireless carriers, reported \$20 billion of fixed local service end-user revenues in 2009. See Table 8. This is about 5% higher than the \$19 billion they had reported for 2008.

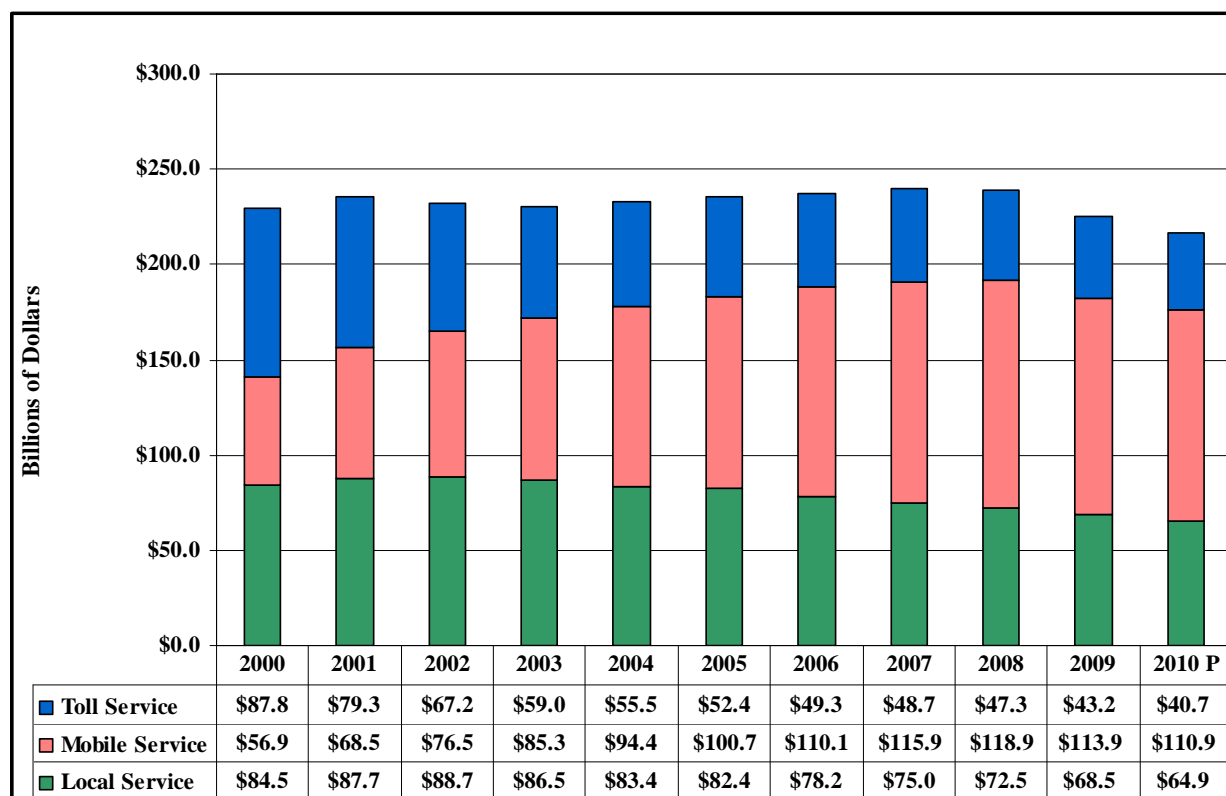

⁶ See 499-A Instructions, section III.C.1.iv, for additional examples of non-telecommunications services. Non-telecommunications revenues are presented only in report Tables 2, 7, and 8.

⁷ Toll revenues collected by Form 499-A include a small percentage of mobile wireless revenues, representing calls that used alternative billing arrangements (credit card, collect, etc.) or that were itemized as toll calls on mobile wireless service bills.

The data for 2009 generally were consistent with recent trends.

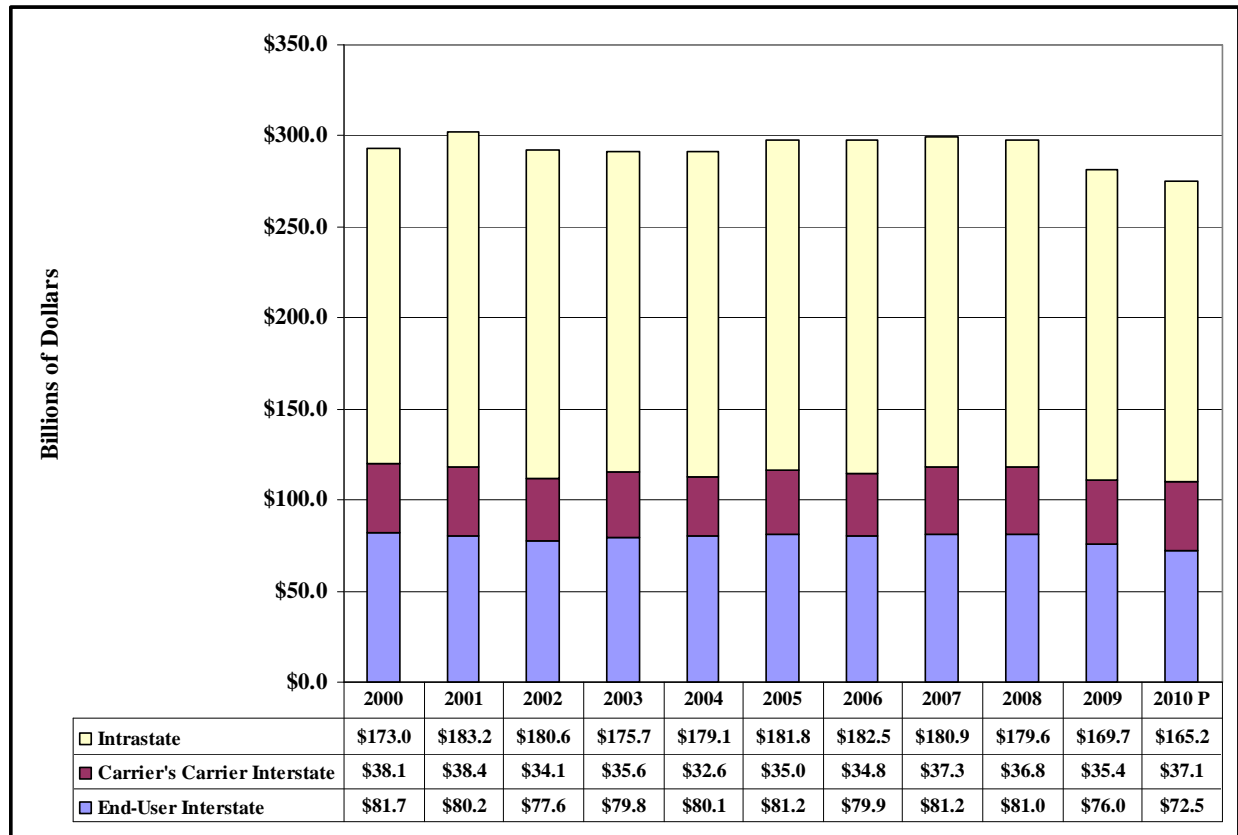

- Chart 1 illustrates that end-user telecommunications revenues were relatively constant from 2000 to 2008 and declined in 2009 and 2010. The chart shows how the mobile wireless service share of end-user revenues has grown relative to the toll service and local service shares.

Chart 1
End-User Telecommunications Revenues

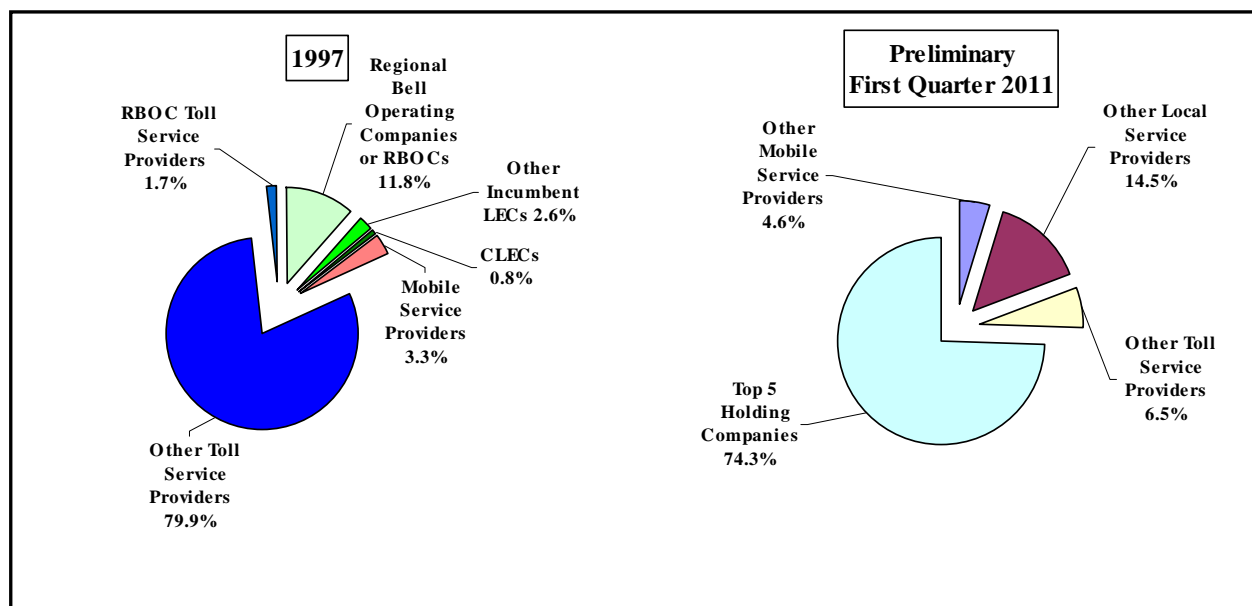

- End-user interstate (including international) telecommunications revenues are the funding base of the federal universal service support mechanisms. Chart 2 shows that these revenues were relatively constant from 2000 to 2008 before declining in 2009 and 2010. The data in the chart also indicate that end-user interstate revenues represent about 27% of total telecommunications revenues.

Chart 2
End-User Interstate Telecommunications and Other Telecommunications Revenues

- Chart 3 illustrates how the share of universal service contributions made by providers with different principal business activities has changed since the universal service support mechanisms were implemented.⁸ In 1997, the three largest contributors were toll carriers and the toll industry made 82% of contributions. Today, AT&T Inc., Deutsche Telekom AG, Qwest Services Corp., Sprint Nextel Corporation, and Verizon Communications, Inc. are the Top Five providers of telecommunications services based on their end-user revenues. These companies will make almost three-fourths of universal service contributions for the first quarter of 2011.⁹ Table 6 shows that, in 2009, the Top Five had about \$56 billion of end-user interstate (including international) telecommunications revenues of which slightly more than one-third (about \$20 billion) was from toll service.

Chart 3
Share of Universal Service Contributions
by Principal Type of Contributor

⁸ See *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776 (1997) (subsequent history omitted).

⁹ Additional detail appears in the last column of Table 10.

FCC Form 499-A Filing Requirements

All providers of telecommunications must file FCC Form 499-A each year, with few exceptions.¹⁰ The filings are made with the Universal Service Administrative Company (USAC), which serves as the Commission's data collection agent. While the most recent filings were due April 1, 2010, some providers filed late or submitted revised filings after that date. Year 2009 data summarized in this report do not include information from filings received after December 2, 2010 or information from filings that were incomplete.

Form 499-A requires each filer to choose a principal business activity that best describes its operations. The business activities among which the filer must choose appear in Table 3.¹¹

Each filer must report total revenues, and separately report (domestic) interstate revenues and international revenues.¹² Revenues in each of the three categories must be broken down between revenues billed to universal service contributors for resale (carrier's carrier revenues) and revenues billed to *de minimis* telecommunications providers and end users (end-user revenues).¹³

Filers must provide further breakdowns of services into local, mobile wireless, and toll service categories. Fixed local services connect a specific point to one or more other points in the same geographic area. These services can be provided using wireline, fixed wireless, or interconnected VoIP technologies and can be used for local exchange service, private communications, or access to toll services. Mobile services are wireless communications between mobile wireless equipment, such as cellular phones, and other points. Toll services are telecommunications services – wireline, wireless, or interconnected VoIP services – that enable customers to communicate outside of local exchange calling areas. Toll service revenues include revenues from intrastate, interstate, and international long distance services.¹⁴

FCC Form 499-A filers are instructed to report amounts actually billed to customers. Therefore, filers must report revenues net of discounts, but without making adjustments to reflect uncollectible

¹⁰ Telecommunications providers that are contributors to any of the support mechanisms (USF, TRS, NANPA, or LNPA) must file Form 499-A. Under certain specified circumstances, three types of non-common-carrier telecommunications providers may not be required to file: (1) *de minimis* telecommunications providers; (2) government, broadcasters, schools, and libraries; and (3) system integrators and self-providers. See *499-A Instructions*, section II.A and Appendix A, for more information.

Telecommunications providers are considered *de minimis* and thus are not required to contribute to USF (or to make quarterly filings of FCC Form 499-Q) if their annual contributions to USF would be less than \$10,000. However, most of these providers must file Form 499-A because they must contribute to another of the support mechanisms (TRS, NANPA, or LNPA).

¹¹ See also, *499-A Instructions*, section III.A and Appendix B.

¹² International-to-international revenues are more specifically identified by filers because these revenues are not assessable for universal service contribution purposes.

¹³ Underlying service providers treat *de minimis* firms as end users for universal service contribution purposes.

¹⁴ Section III.C.1 of *499-A Instructions* provides additional information on revenue reporting categories.

revenues or international settlement payments or receipts.¹⁵ Most filers should be able to report revenues in this manner using information contained in their corporate books of account. Some service providers, however, have no business or regulatory requirements to record intrastate or international revenues separately from interstate revenues, or to use the detailed revenue categories contained in the worksheets. In addition, many wireless providers use the interim safe harbor percentages to estimate the interstate portion of their revenues, and a different safe harbor interstate percentage is available to interconnected VoIP providers.¹⁶ Therefore, disaggregated data are likely to be less accurate than the industry totals presented in this report.

¹⁵ Filers began to provide some information on uncollectible revenues starting with the February 1, 2003 FCC Form 499-Q filing. Beginning in the second quarter of 2003, universal service assessments have been based on projected collected revenues, rather than billed revenues from a prior period.

¹⁶ See *499-A Instructions*, section III.C.3.

Summary Tables

Table 1 shows the major components of telecommunications revenues for 1999 through 2010. This table was created by aggregating the revenues in the major service categories designated on FCC Form 499-A. FCC Form 499-Q data were used to provide preliminary figures for 2010.

Tables 2 and 3 provide a more detailed look at annual industry revenues by disaggregating the data in two ways: (1) by the type of service provided; and (2) by the filer's type (*i.e.*, principal business activity, reported by the filer on Line 105 of Form 499-A). **Table 2** disaggregates revenues by type of service and shows, for example, that carriers reported \$118 billion total (carrier's carrier and end user) mobile wireless service revenues for 2009. But this total includes mobile service revenues from some carriers whose principal business activity is not mobile service. In contrast, **Table 3** shows that filers whose principal business activity is mobile service reported total (carrier's carrier and end user) revenues of \$121 billion in 2009, and this total includes some revenues from fixed local and toll services.

Many filers erroneously report substantial amounts of *switched toll* revenues as *other long distance* revenues. The data are examined and some revenues are reclassified based on staff research. Even so, the *other long distance* category of Table 2 may contain some *switched toll* revenues, perhaps significant amounts in some years.

Readers who are interested in historical trends in the data should note that reporting requirements changed over time. Four significant examples are:

First, prior to 2002, each legal entity providing telecommunications was required to file separately. Starting in 2002, entities meeting specific conditions were allowed to file on a consolidated basis. For some companies, the books at the consolidated-entity level include substantial amounts of *non-telecommunications* revenues for legal entities that do not individually provide telecommunications and therefore would not be required to file on an individual basis. Their revenues, however, must be included when filings are made on a consolidated basis because the revenues are recorded on the consolidated books.

Second, the reporting requirements for *wireline broadband Internet access transmission provided on a non-common carrier basis* changed between November 2005 and August 2006. After August 13, 2006, revenues for all wireline broadband Internet access transmission provided on a non-common carrier basis are reported on Line 418 with other non-U.S. telecommunications revenues.

Third, prior to the fourth quarter of 2006, a few CLECs included revenues from *interconnected VoIP services* as part of telecommunications revenue. Other interconnected VoIP service revenues were included on Line 418 – non-telecommunications revenues – but only by entities that were required to file for other reasons. Starting with the fourth quarter of 2006, all revenues from providing interconnected VoIP service must be included as telecommunications revenues in FCC Form 499 filings.¹⁷

Fourth, prior to the fourth quarter of 2008, a few teleconferencing service providers reported audio bridging service revenues as telecommunications. Starting with the fourth quarter of 2008, all audio bridging service revenues must be reported as telecommunications.¹⁸

¹⁷ See 2006 Contribution Methodology Reform Order, 21 FCC Rcd at 7536-49, paras. 34-62.

¹⁸ See Request for Review by InterCall, Inc. of Decision of the Universal Service Administrator, CC Docket No. 96-45, Order, 23 FCC Rcd 10731(2008).

Table 4 illustrates how data from the FCC Form 499-A are used to develop funding bases for the universal service (USF), TRS, NANPA, and LNPA support mechanisms. Each of the programs is supported by a slightly different group of telecommunications providers under slightly different rules. For USF support purposes, providers are considered *de minimis* if their annual contribution is expected to be less than \$10,000. While such providers are thus not required to file FCC Form 499-Q, *de minimis* status does not exempt service providers from filing FCC Form 499-A because contributions to TRS, NANP, and LNP are required regardless of the expected annual amount.

The TRS, NANPA, and LNPA support mechanisms each draw contributions from a larger pool of providers than does USF. Specifically, all telecommunications carriers in the United States must contribute to meet NANPA costs (47 C.F.R. § 52.17), and all telecommunications carriers that provide service in areas covered by the regional LNP database must contribute to meet LNPA costs (47 C.F.R. § 52.32). Thus, only those providers that are not carriers are not required to contribute. Cost recovery for TRS is slightly different. Every carrier providing interstate service must contribute (47 C.F.R. §64.604 (c)(5)(iii)(A)). In this case, providers that are not carriers, and carriers that do not provide interstate services are not required to contribute.¹⁹

Tables 5 through 8 present detailed industry roll-ups by type of revenue and type of filer. Starting with this report, roll-up statistics are presented for the five holding companies with the most end-user telecommunications and interconnected VoIP revenues. In 2009, the Top Five providers were AT&T Inc., Deutsche Telekom AG, Qwest Services Corp., Sprint Nextel Corporation, and Verizon Communications, Inc. In previous reports, these tables showed detail for the Regional Bell Operating Companies (RBOCs).

Table 5 provides a detailed breakout of revenues for each of the FCC Form 499-A revenue categories used to report services provided to other filers for resale. **Table 6** displays similar detail for each of the revenue categories used to report telecommunications service provided to end users.

In a few cases, filers now provide some breakout detail that is not published in Table 5 or Table 6. The following information may assist readers who are interested in the greater level of detail.

First, amounts shown in Table 5 for Line 305 (local private line and special access) include revenues reported on Line 305.1 (for resale as telecommunications) and Line 305.2 (for resale as interconnected VoIP).

Second, Table 6 combines the amounts reported on Line 404.1 (traditional circuit switched local exchange service bundled with toll) and Line 404.3 (traditional circuit switched local exchange service provided without bundled toll). In 2009, 12% of circuit switched local exchange revenue was reported for service that was bundled with toll. The toll portion of the bundles, reported on Line 404.2, was consolidated with Line 414 (other long distance) and is not included with Line 404 or in the 12% figure. It is likely that many carriers reported all local exchange service on line 404.3 (*i.e.*, as stand-alone circuit switched local service). However, in 2009, those carriers that did separately report bundled and unbundled local exchange service revenues reported that 31% of revenues were for the local portion of service bundles.

¹⁹ See 499-A Instructions, Table 2 (“Which Telecommunications Providers Must Contribute for Which Purposes”). Carriers that provide only international services are considered to be interstate carriers for TRS contribution purposes.

Third, Table 6 combines amounts reported on Line 404.4 (interconnected VoIP service offered in conjunction with a broadband connection) and Line 404.5 (interconnected VoIP service offered independent of a broadband connection). In 2009, 84% of interconnected VoIP revenue was provided in conjunction with a broadband connection.

Fourth, Line 414 (ordinary long distance) in Table 6 includes amounts reported on Line 414.1 (charges for most long distance calls other than those reportable on Line 414.2) and on Line 414.2 (separately charged long distance calls provided as part of an interconnected VoIP service). In 2009, 5% of the total revenues summarized on Line 414 were reported as ordinary long distance provided in conjunction with interconnected VoIP service. Note that there are no separate long distance charges for most long distance calls placed by interconnected VoIP service customers.

Table 7 combines data from Tables 5 and 6 with data on non-telecommunications revenues to develop total industry revenues. **Table 8** provides more aggregated revenue information by type of filer.

FCC Form 499-A asks filers to identify the share of their carrier's carrier and end-user telecommunications revenues attributable to different regions of the country. **Table 9** shows end-user telecommunications revenues by region for filers whose principal business activity is local, toll, or mobile wireless service, respectively. **Table 10** provides information about the relative magnitude of contributions to the universal service fund by providers with different principal business activities. The table shows that the Top Five holding companies based on end-user telecommunications and interconnected VoIP service revenues provide about three-quarters of the fund's contributions.

Table 1
Overview of Telecommunications Industry Revenues 1/
(Dollar Amounts Shown in Millions)

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	Preliminary 5/ 2010
Carrier's Carrier Revenues 2/											
Local Service 3/	\$36,621	\$40,108	\$38,412	\$37,742	\$38,546	\$39,213	\$39,392	\$38,383	\$39,200	\$38,285	\$42,363

Total	\$292,762	\$301,799	\$292,341	\$291,123	\$291,734	\$297,921	\$297,268	\$299,451	\$297,365	\$281,052	\$274,831

Note: Detail may not add to totals due to rounding.

- 1/ Data include revenues for *de minimis* filers as well as for other carriers that are exempt from universal service contribution requirements.
- 2/ Carrier's carrier revenues are reported on the FCC Form 499-A as sales to other universal service contributors for resale. This includes, for example, access services that local exchange carriers provide to toll carriers. Sales to *de minimis* resellers, end-user customers, governments, non-profits, and any other non-contributors are treated as end-user revenues. Filers contribute to the universal service funding mechanisms based on their end-user interstate revenues. See Table 4 for further details on contribution bases.
- 3/ Payphone revenues are included with local service revenues in this table.
- 4/ Revenues from calls that both originate and terminate in foreign points are reported as end-user revenues, and are included in this table through 2009, but are not included in the universal service contribution base. These revenues are not included in preliminary 2010 data.
- 5/ Preliminary 2010 data are based on FCC Form 499-Q quarterly filings through November, 2010. Companies that do not contribute to universal service are not required to make these filings. The quarterly filings include preliminary data for the just closed quarter and projections for the coming quarter, and therefore are not as accurate as the subsequent annual filings. Also, FCC Form 499-Q filers do not separate revenue by type of service. Therefore, revenue totals by service type for 2010 are based on type of filer rather than on data filed by service.

Note: Detail may not add to totals due to rounding.

1/ Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenues. In calculating the totals shown, reported amounts for each filer are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate, interstate and international end-user revenues for that filer.

Note: Detail may not add to totals due to rounding.

1/ Filers must identify a service category for their principal business activity. The choices of service categories have changed over the years. For example, for 2003 through 2006, some filers identified themselves as All Distance carriers. These filers have been reclassified to be consistent with prior classifications. Starting with the 2006 data, some filers identified themselves as interconnected VoIP service providers and some filers first began reporting interconnected VoIP service revenues.

Table 4
Contribution Base Revenues By Program 1/: 2009
(Dollar Amounts Shown in Millions)

		2009
Revenues subject to universal service contribution		
	Billed interstate and international end-user revenues [Line 412(e) + Line 420(d) + Line 420(e)]	\$75,988
less	revenues for international - to - international services [Line 412(e)]	\$576
less	international revenues of international-only filers and international revenues that were excluded because of the LIRE Exemption 2/	\$3,393
less	interstate and other international revenues for 1,775 filers who are de minimis or otherwise exempt from universal service support requirements	\$49
less	uncollectible contribution base revenues [Line 422(d) + Line 422(e)] (Does not include uncollectible amounts associated with revenues excluded above.)	\$1,075
equals		<u>\$70,895</u>
Revenues subject to TRS contribution		
	Interstate and international end-user revenues	\$75,988
less	interstate and international revenues for 144 filers who identify themselves as private service providers or as shared-tenant service providers and who therefore are exempt from telecommunications relay service (TRS) contribution requirements if they provide no carrier services	445
less	interstate and international revenues for services provided for resale but reported as end user because it was provided to carriers that do not contribute to universal service support mechanisms [Line 511(b)]	388
equals		<u>\$75,155</u>
Revenues subject to NANPA and LNP contribution		
	Total telecommunications service end-user revenues (including intrastate, interstate and international)	\$225,481
less	telecommunications revenues for 533 filers who identify themselves as private service providers, shared-tenant service providers or payphone service providers and who therefore are exempt from North American Numbering Plan Administration (NANPA) and local number portability administration (LNP) contribution requirements if they provide no carrier services	806
less	telecommunications revenues for services provided for resale but reported as end user because it was provided to carriers that do not contribute to universal service support mechanisms [Line 511 (a)]	412
equals		<u>\$224,262</u>

- 1/ This table shows how contribution bases differ for different programs and provides relative magnitudes, but does not provide the actual amounts used for determining contributions. Amounts shown represent the amounts contained in the FCC Form 499-A database as of December 2, 2010. The universal service administrator continues to receive additional and corrected filings. Exempt amounts were based on revenues and the filer type (i.e., principal business activity) information contained in the FCC Form 499-A filings. The fund administrators may use carrier type, revenue type, Line 603 exemption certifications, and additional information requested from filers to determine which filers are required to contribute. The universal service fund administrator bills delinquent filers based on estimated revenues and may, in some instances, include estimated revenue amounts in contribution base amounts. The universal service contribution factors are set quarterly based on FCC Form 499-Q filings. FCC Form 499-A data are used for true-up and auditing purposes. Local number portability contribution amounts are determined by region of the country rather than on a nationwide basis. As a result of these factors, actual contribution bases have been based on different amounts than those shown.
- 2/ A provider receives the LIRE Exemption, and its international revenues are excluded from the contribution base, if the total amount of interstate end-user revenues for the filing entity consolidated with all affiliates is less than 12% of the total of interstate and international end-user revenues for the filing entity consolidated with all affiliates. See 47 C.F.R. § 54.706(c). The threshold was increased from 8% to 12% in 2002. See Federal-State Joint Board on Universal Service, et al., CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-166, 98-170, Further Notice of Proposed Rulemaking and Report and Order, 17 FCC Rcd 3752, 3806, para. 125 (2002). In addition, filers that provide only international services are exempt regardless of services offered by affiliates.

- 1/ Revenues are classified by the primary carrier type of each reporting entity. For example, revenues reported by a LEC affiliate that identifies itself as an IXC are included in the table as IXC revenues. Many LECs provided both local and long distance services as part of package plans. Most of the revenues for the toll portion of these bundles were reported as toll revenues on FCC Form 499-A filings of LEC toll affiliates.
- 2/ Telecommunications and interconnected VoIP service provided for resale consists of services provided to other contributors to federal universal service support mechanisms for resale. Revenues from services provided to firms that are *de minimis* or exempt from federal universal service support mechanisms are reported as end-user service revenues and are subject to contribution requirements.

* Denotes values greater than \$0 but less than \$500,000.

- 1/ Revenues are classified by the primary carrier type of each reporting entity. For example, revenues reported by a LEC affiliate that identifies itself as an IXC are included in the table as IXC revenues. Many LECs provided both local and long distance services as part of package plans. Most of the revenues for the toll portion of these bundles were reported as toll revenues on FCC Form 499-A filings of LEC toll affiliates.
- 2/ Telecommunications and interconnected VoIP service provided for resale consists of services provided to other contributors to federal universal service support mechanisms for resale. Revenues from services provided to firms that are *de minimis* or exempt from federal universal service support mechanisms are reported as end-user service revenues and are subject to contribution requirements.
- 3/ Universal service contribution base revenues consist of all interstate and international end-user telecommunications revenues except for international-to-international revenues reported on Line 412. The totals include revenues from filers who are *de minimis* or otherwise exempt from contributing. This table also includes international revenues that were exempt from contribution because of the LIRE Exemption. See Table 4 for details on exempt amounts. Contribution base amounts reported as uncollectible on Line 422 have been removed.
- 4/ Carriers report non-telecommunications service revenues on Line 418. This category includes enhanced services, inside wiring maintenance, billing and collection, customer premises equipment, published directory, dark fiber, Internet, foreign carrier and other non-U.S. telecommunications service revenues.

Table 9
End-User Telecommunications and Interconnected VoIP Service Revenues
By Region of the Country 1/: 2009
(Dollar Amounts Shown in Millions)

	By Type of Filer			All Services	
	Fixed Local and Payphone	Toll including Satellite	Wireless	Total for Region	Region as Percent of Total
Southeast: Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Puerto Rico, South Carolina, Tennessee, and U.S. Virgin Islands	\$15,812	\$6,972	\$26,090	\$48,874	21.7 %
Western: Alaska, Arizona, Colorado, Idaho, Iowa, Minnesota, Montana, Nebraska, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming	9,107	4,580	15,322	29,009	12.9
West Coast: California, Hawaii, Nevada, American Samoa, Guam, Northern Mariana Islands, and Wake Island	9,694	5,046	16,140	30,879	13.7
Mid-Atlantic: Delaware, District of Columbia, Maryland, New Jersey, Pennsylvania, Virginia, and West Virginia	9,581	5,340	12,547	27,467	12.2
Mid-West: Illinois, Indiana, Michigan, Ohio, and Wisconsin	10,731	4,488	16,368	31,587	14.0
Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont	9,232	4,395	13,304	26,932	11.9
Southwest: Arkansas, Kansas, Missouri, Oklahoma, and Texas	8,864	4,528	15,759	29,152	12.9
Filers that did not identify revenues by region 1/	527	1,048	4	1,579	0.7
Total	\$73,548	\$36,397	\$115,535	\$225,481	100.0 %

Note: Detail may not add to totals due to rounding.

1/ Filers that are exempt from contributing to local number portability administration are not required to provide a breakout by region of the country.

Note: Detail may not add to totals due to rounding. Some data for prior years have been revised.

1/ For years through 2002, the percentages are based on shares of reported subject interstate and international end-user billed revenues. The percentages shown for 2003 through 2009 are based on shares of reported subject interstate and international end-user collected revenues. Preliminary percentages shown for 2010 and 2011 are based on projected end-user collected revenues from FCC Form 499-Q filings. Calculations exclude revenues for calls that both originate and terminate in foreign points and revenues that qualify for the LIRE Exemption. Calculations were based on data from all filers, including some that were exempt from making universal service contributions.

2/ On FCC Form 499, filers must identify a service category for their principal business activity.

3/ The Top Five providers of end-user telecommunications and interconnected VoIP services for all periods shown, based on end-user revenues, were AT&T Inc., Deutsche Telekom AG, Qwest Services Corp., Sprint Nextel Corporation and Verizon Communications.

Source: FCC Form 499.

Customer Response

Publication: *Telecommunications Industry Revenues: 2009*

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis & Technology Division of the FCC's Wireline Competition Bureau.

1. Please check the category that best describes you:

- ☐ press
- ☐ current telecommunications carrier
- ☐ potential telecommunications carrier
- ☐ business customer evaluating vendors/service options
- ☐ consultant, law firm, lobbyist
- ☐ other business customer
- ☐ academic/student
- ☐ residential customer
- ☐ FCC employee
- ☐ other federal government employee
- ☐ state or local government employee
- ☐ Other (please specify)

2. Please rate the report:	Excellent	Good	Satisfactory	Poor	No opinion
Data accuracy	()	()	()	()	()
Data presentation	()	()	()	()	()
Timeliness of data	()	()	()	()	()
Completeness of data	()	()	()	()	()
