

OFFICE OF  
THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

October 24, 2017

The Honorable Mike Bost  
U.S. House of Representatives  
1440 Longworth House Office Building  
Washington, D.C. 20515

Dear Congressman Bost:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. Your views are very important and will be entered into the record of the proceeding.

In my first remarks to FCC staff as Chairman earlier this year, I declared that my highest priority would be making sure every American who wants high-speed Internet access can get it. Rural Americans deserve the same digital access as those living in more urban areas.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers had an incentive to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies – not because consumers didn't want it, but because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. It has become clear, as my colleagues and I have worked our way through the so-called punch list of lingering issues from the 2016 Order, that more fundamental reforms are needed. The statute directs that universal service

Page 2—The Honorable Mike Bost

support be specific, predictable, and sufficient. Yet today I worry we are not achieving that objective for many legacy rate-of-return carriers.

For those carriers that continue to receive support from the legacy rate-of-return system, I am committed to exploring how this situation can be changed and to determine the appropriate budget levels. The Commission should address the uncertainty caused by the current budget control mechanism – such as guaranteeing at least some minimum level of support to ease the unpredictability and allow reasonable capital planning – while being mindful of mitigating incentives to operate inefficiently.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Ajit V. Pai". The signature is written in a cursive style with a large initial "A" and a long, sweeping tail on the "i".

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. It has become clear, as my colleagues and I have worked our way through the so-called punch list of lingering issues from the 2016 Order, that more fundamental reforms are needed. The statute directs that universal service

support be specific, predictable, and sufficient. Yet today I worry we are not achieving that objective for many legacy rate-of-return carriers.

For those carriers that continue to receive support from the legacy rate-of-return system, I am committed to exploring how this situation can be changed and to determine the appropriate budget levels. The Commission should address the uncertainty caused by the current budget control mechanism – such as guaranteeing at least some minimum level of support to ease the unpredictability and allow reasonable capital planning – while being mindful of mitigating incentives to operate inefficiently.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Ajit V. Pai". The signature is written in a cursive style with a large initial "A" and a long tail on the "i".

OFFICE OF  
THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

October 24, 2017

The Honorable Sam Graves  
U.S. House of Representatives  
1135 Longworth House Office Building  
Washington, D.C. 20515

Dear Congressman Graves:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. Your views are very important and will be entered into the record of the proceeding.

In my first remarks to FCC staff as Chairman earlier this year, I declared that my highest priority would be making sure every American who wants high-speed Internet access can get it. Rural Americans deserve the same digital access as those living in more urban areas.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers had an incentive to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies – not because consumers didn't want it, but because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. Dear Congressman Mullin:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. Your views are very important and will be entered into the record of the proceeding.

In my first remarks to FCC staff as Chairman earlier this year, I declared that my highest priority would be making sure every American who wants high-speed Internet access can get it. Rural Americans deserve the same digital access as those living in more urban areas.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers had an incentive to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies – not because consumers didn't want it, but because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. It has become clear, as my colleagues and I have worked our way through the so-called punch list of lingering issues from the 2016 Order, that more fundamental reforms are needed. The statute directs that universal service

support be specific, predictable, and sufficient. Yet today I worry we are not achieving that objective for many legacy rate-of-return carriers.

For those carriers that continue to receive support from the legacy rate-of-return system, I am committed to exploring how this situation can be changed and to determine the appropriate budget levels. The Commission should address the uncertainty caused by the current budget control mechanism – such as guaranteeing at least some minimum level of support to ease the unpredictability and allow reasonable capital planning – while being mindful of mitigating incentives to operate inefficiently.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Ajit V. Pai". The signature is written in a cursive style with a large initial "A" and a long, sweeping tail on the "i".

OFFICE OF  
THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

October 24, 2017

The Honorable Kristi Noem  
U.S. House of Representatives  
2457 Rayburn House Office Building  
Washington, D.C. 20515

Dear Congresswoman Noem:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. Your views are very important and will be entered into the record of the proceeding.

In my first remarks to FCC staff as Chairman earlier this year, I declared that my highest priority would be making sure every American who wants high-speed Internet access can get it. Rural Americans deserve the same digital access as those living in more urban areas.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers had an incentive to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies – not because consumers didn't want it, but because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. It has become clear, as my colleagues and I have worked our way through the so-called punch list of lingering issues from the 2016 Order, that more fundamental reforms are needed. The statute directs that universal service

support be specific, predictable, and sufficient. Yet today I worry we are not achieving that objective for many legacy rate-of-return carriers.

For those carriers that continue to receive support from the legacy rate-of-return system, I am committed to exploring how this situation can be changed and to determine the appropriate budget levels. The Commission should address the uncertainty caused by the current budget control mechanism – such as guaranteeing at least some minimum level of support to ease the unpredictability and allow reasonable capital planning – while being mindful of mitigating incentives to operate inefficiently.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Ajit V. Pai". The signature is written in a cursive style with a large initial "A" and a long, sweeping tail.

Dear Congressman Scott:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. Your views are very important and will be entered into the record of the proceeding.

In my first remarks to FCC staff as Chairman earlier this year, I declared that my highest priority would be making sure every American who wants high-speed Internet access can get it. Rural Americans deserve the same digital access as those living in more urban areas.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers had an incentive to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies – not because consumers didn't want it, but because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem, but we have not. Despite what was framed as an order adopting “significant reforms,” the Commission's 2016 Rate-of-Return Order – which I did not support – has not had its intended effect. I repeatedly hear from small carriers that offering stand-alone broadband would put them underwater, that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural, America.

Nor, as I predicted in my dissent to that Order, have we given carriers “sufficient incentive to be prudent and efficient in their expenditures.” Due to the complexity of the budget control mechanism, carriers do not have the certainty they need to make the long-term investment decisions that will lead to greater connectivity. It has become clear, as my colleagues and I have worked our way through the so-called punch list of lingering issues from the 2016 Order, that more fundamental reforms are needed. The statute directs that universal service

support be specific, predictable, and sufficient. Yet today I worry we are not achieving that objective for many legacy rate-of-return carriers.

For those carriers that continue to receive support from the legacy rate-of-return system, I am committed to exploring how this situation can be changed and to determine the appropriate budget levels. The Commission should address the uncertainty caused by the current budget control mechanism – such as guaranteeing at least some minimum level of support to ease the unpredictability and allow reasonable capital planning – while being mindful of mitigating incentives to operate inefficiently.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Ajit V. Pai". The signature is written in a cursive style with a large initial "A".
