**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDWR-18-00026100

On January 29, 2018, Agents from the Denver Office (Denver Office) of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) confirmed by direction finding techniques that radio signals on frequency 93.1 MHz were emanating from your residence located on South 43<sup>rd</sup> Street in Boulder, Colorado. Public records list you as the owner of this property. The Commission's records show that no license was issued for a broadcast station on 93.1 MHz at this location in Boulder, Colorado.

Radio stations operating on a range of frequencies,<sup>1</sup> including 93.1 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> Agents measured the field strength of the signal on the frequency 93.1 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu$ V/m at 3 meters for non-licensed devices. Thus, the station was operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem*
