**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-17-00025807

On January 10, 2018, Agents from the Chicago Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated a complaint of an unlicensed FM station operating on the frequency 100.9 MHz in Bridgeport, Connecticut. The Agents confirmed by direction finding techniques that radio signals on frequency 100.9 MHz were emanating from a commercial property at 2320 Main Street, Bridgeport, Connecticut. Through investigation, Agents confirmed that you are the operator of the unlicensed radio station. The Commission's records show that no license was issued for operation of a radio station on 100.9 MHz at this location in Bridgeport, Connecticut.

Radio stations operating on a range of frequencies,<sup>1</sup> including 100.9 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> On January 10, 2018, Agents measured the field strength of the signal on the frequency 100.9 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu\text{V}/\text{m}$  at 3 meters for non-licensed devices. Thus, the station was operating in violation of Section 301 of the Act.<sup>4</sup>
