Subject: Single Frequency Experimental License – Arlington Airport, Arlington Texas

To Whom It May Concern:

Bell Helicopter is requesting a single frequency (2282.5) temporary license in order to perform R & D flight test activities at the Bell flight test facility located next to the Arlington Municipal Airport in Arlington, Texas for a period of about two months. Testing involves development that will lead to unmanned flights in Yuma. Testing under this experimental license shall involved manned flights to the south of the Arlington, Texas Municipal Airport and within a range of 75 Km.
