Subject: Single Frequency Experimental License – Arlington Airport, Arlington Texas

To Whom It May Concern:

Bell Helicopter is requesting a single frequency temporary license in order to perform R & D flight test activities at the Bell flight test facility located next to the Arlington Municipal Airport in Arlington, Texas for a period of about four months. Testing involves development that will lead to unmanned flights in Yuma. Testing under this license shall involve manned flights to the south of the Arlington, Texas Municipal Airport and within a range of 75 Km.

Transmitter:
TTS-11330 S-band Telemetry Transmitter
Teletronics Technology Corp.
Emission Designator: 3M50F1D

Stop buzzer:
The designated point of contact to terminate transmissions if interference occurs is Mr. Cal Cooper or Mrs. Valori Reid with Bell flight test data operations at (817) 280-4862.

Thank you,

Mark Stoufflet
BHTI Frequency Coordinator
