

Narrative Statement

Adaptrum, Inc. STA Application

STA File Number: 0558-EX-ST-2011

This application is for final development of a TV white space device using the rules developed in Docket 04-186. The devices tested will comply with **all** aspects of §§15.701,717 with the exception of having equipment authorization and using an approved database. The lack of an approved database at this time prevents equipment authorization for these devices.

Adaptrum will use databases provided by one or two companies which have applied to FCC for database approval.

It is understood that SBE coordination may be required and Adaptrum has no objection to such a condition.
