**Subject:** RE: OET Experimental Licensing Branch Notification

Rich,

The frequencies that we would defiantly want to use:

1,999.0 MHz  
2,016.5 MHz  
2,033.5 MHz  
2,050.5 MHz  
2,067.5 MHz  
2,084.5 MHz  
2,101.5 MHz  
2,458.5 MHz  
2,475.5 MHz  
2,492.0 MHz

If it would help to limit the radius of operations to 60Km, we could live with it, but would prefer to keep it at 65Km.

The purpose of the license is to test our current equipment, test potential newly purchased or demo equipment, provide equipment training and demonstrate our capabilities to customers.

As far as the use of the equipment testing and demonstration will occur several times a month and the duration will be about two hours each time and should occur around 10:00 am or 2:30pm. The training aspect will occur Monday – Friday two to three times a day (approx. 8:00am, 11:00pm, 2:30pm) for duration of two hours. (The hours listed are approximate and we could be transmitting outside of those timeframes.)

As far as contacts for interference issues:

Rod Ward  
321-268-9922 Office  
321-305-3040 Mobile  
7017 Challenger Ave  
Titusville, FL 32780

Adam Meyer  
321-268-9922 Office  
321-960-9841 Mobile  
7017 Challenger Ave  
Titusville, FL 32780

Kurt Clark

321-268-9922 Office

321-960-9835 Mobile

7017 Challenger Ave

Titusville, FL 32780

Let me know if you need any additional information and if I need to contact the FCC directly or if you will be submitting this information to them on our behalf.

Cheers,

**Kurt Clark**
