Rich,
The application has been coordinated with NTIA and we'll wait to hear back from them as whether or not a license can be granted. I don't anticipate any issues being raised since this is done before. Like the previous authorization please provide a stop buzzer POC.

Thanks
Ben

Hi Ben, you may remember we worked with you on this one on a couple of occasions. They are just trying to repeat the same experiment. They have been in touch with Pacific Command to coordinate this demonstration.

Do you think it will be a problem to get this granted?

If you have any questions, or require additional information, please feel free to contact me.

Sincerely,
