

The purpose of the current exist station operating under STA and with callsign WF9XIH is to act as an historical radio event station in commemoration of significant events in the days of early wireless transmissions or dates. WF9XIH operations in the past STA period have been for events such as the 1906 Berlin Treaty signing, the 100th anniversary of the sinking of the Titanic as well as the Christmas anniversary of Fessenden's very first voice transmissions. SWL reports for all events have been overwhelming, and WF9XIH has only operated for these purposes.
