

Additional Ground Station

Morehead State University's 21 meter parabolic dish has been added as a ground station to support Cosmogia's Dove 2 experimental satellite mission, scheduled for a mid-April 2013 launch. Morehead will be supporting the initial commissioning phase of the Dove 2 mission, allowing for basic TT&C functions and initial payload downlinking over the 2.4 GHz radio link.

The file number for this ground station application is 0307-EX-ST-2013, call sign WG9XLH.
