

**Before the  
Federal Communications Commission  
Washington, D.C. 20554**

In the Matter of	)	
	)	
Energous Corporation	)	File No.: 1890-EX-ST-2018
	)	
Application for Special Temporary Authorization	)	

**ADDENDUM TO INFORMAL OBJECTION**

In possible violation of the Commission's equipment marketing rules 47 CFR 2.803, Energous Corporation ("Applicant") issued a press release on December 27, 2018 falsely claiming that "the personal sound amplification products (PSAP) from Delight, in partnership with SK Telesys, are now certified to be marketed and sold in the United States" and that the "FCC approval of the Delight PSAP hearing device is a very significant and positive announcement." ( <https://globenewswire.com/news-release/2018/12/27/1678432/0/en/Energous-Corporation-Announces-First-Customer-Product-Approval-from-FCC.html> )

A search of the Commission's equipment authorization database shows no approval of such a PSAP hearing device or a suitable module on or prior to December 27, 2018.

In light of this possible violation, I now urge the Commission to deny this Application and demand an explanation from the Applicant.

Respectfully submitted,

By: /s/
