

Directional Antenna Information:

Is a directional antenna (other than radar) used?:

Yes No

If yes, provide the following information:

- i. Width of beam in degrees at the half power point: 7.6 deg.
- ii. Orientation of the beams relative to the vertical axis: 75.9 deg.
- iii. Orientation of the beams relative to the horizontal plane: The radar wind profiler will operate with six beams with a 60-deg spacing between them. The radar will transmit in one of those six beam directions at a time.
