

## EMC Interference Analysis of 2.4GHz Globalstar NGSO MSS network

This request will result in no possibility for increased interference. In this request, Globalstar seeks authority, in connection with the CubeSat mission, to transmit from its space stations to the CubeSat in the 2483.5 to 2500 MHz band. The link from the Globalstar space stations to CubeSats is indistinguishable in its characteristic from the technical characteristics of Globalstar's already-licensed space station transmissions in the 2483.5 to 2500 MHz MHz band.
