

**APPLICATION FOR EXPERIMENTAL LICENSE**

FalconION, Inc. (“FalconION”), pursuant to Sections 5.3(j) and 5.51(a) of the Commission’s rules, hereby requests a conventional experimental license to operate on select frequencies in the 7 – 17 MHz portion of the High Frequency (“HF”) band. FalconION is managed and staffed by persons with decades of collective experience designing and developing RF equipment. FalconION seeks to test experimental radio transmitters and develop new radio technique for reliably delivering short digital messages over long distances. Additional information regarding FalconION’s proposed experimental operations is set forth in Exhibit B.

FalconION seeks a license for a period of 36 months in order to accumulate statistical data regarding the performance characteristics of its experimental equipment and radio technique in various configurations over time, including seasonal variations impacting operations in the HF Band.
