

DRS SUSTAINMENT SYSTEMS, INC.
FCC FORM 442
ATTACHMENT ONE

QUESTION 4: STATEMENT REGARDING GOVERNMENT CONTACT

DRS Sustainment Systems, Inc. (“DRS” or “Applicant”) submits the subject FCC Form 442 application in connection with performing certain testing under a contract with the U.S. Army (Contract # W31P4Q-20-D-0031), in connection with a project entitled “Mobile Low, Slow, Small Unmanned Aircraft System Integrated Defeat System (MLIDS).” The contract requires testing of radio products in connection with the development of MLIDS and ensuring proper detection capabilities.

DRS has been conducting tests of the subject Rajant radio in connection with MLIDS development pursuant to an earlier contract (W31P4Q-19-C-0006), and pursuant to special temporary authority (“STA”) under Call Sign WQ9XOU. Under the current contract, testing will be required for a more extended period of time; DRS is therefore submitting this application for license.
