

**LEONARDO DRS, INC.
FCC FORM 442
AMENDMENT**

AMENDMENT TO APPLICATION

In response to the Commission's inquiry, Correspondence Reference Number 67129, dated January 27, 2022, Leonardo DRS, Inc. ("Applicant") submits the foregoing amendment to change the ERP of the proposed station to correct a clerical error. The correct ERP will be 25 megawatts, *not* gigawatts.

The excessive ERP in the original application was the result of an inadvertent error in completing the Form. As the ERP is corrected in the foregoing amended application, Applicant respectfully submits that the detailed engineering analysis requested to justify 25 gigawatts operations is unnecessary.
