Application Narrative for Proposed Equipment

Proposed Program

Future Technologies Venture is proposing GPS within their laboratory facility for testing purposes.

Objectives

We seek to accomplish the following objectives:

1. Illumination of the part of the laboratories, located at 355 Satellite Blvd, Ste 350, Suwanee, GA with a GPS signal to allow for the testing and experimentation indoors for continued exploration of providing GPS-enabled technologies for industries spanning oil & gas, mining, smart manufacturing, railroad and utilities. The GPS repeater system provides for enhancement of existing products and creation of entirely new products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information.
