Behnam and Hung,

Understood. Thanks for checking and responses! The response is very helpful!

Thanks,

Sylvia

Sylvia,

Below is a response from WTB/MD regarding your comment/question for one of the C-Band incumbent licensee not being on the list. As it is stated by WTB, the hold on this portion of the spectrum (3.7-4.2 GHz) is imposed by OCH and we are not going to take any action until further guidance by OCH.

In any case, thanks for your review and feedback.

Ben

Hi Behnam and Hung,

Regarding the question/inquiry from IB regarding 3700-4200 MHz band, consistent with OCH guidance stemming from concerns about the risk to radio altimeters, MD has maintained the internal hold on experimental applications for the entirety of this band. Any departure from this policy has to be approved by OCH on a case by case basis, considering many factors such as what part of the band is requested by the applicant and the proximity to the airports. As always, I would like to remind you that this information is internal to FCC and not to be shared with outside parties.

Thanks,
Moslem

Hi Moslem,
Would you please comment on the issue below?
Thank you,
Hung

Hung,
I know that WB is holding request for 3700-4200 MHz band.
I found one receiving C-band earth station that is not in the list :
<https://docs.fcc.gov/public/attachments/DA-20-823A2.xls>.
I consider this earth station is not part of C-band auction. And so, I think this application should not be holding. Am I right?
Would you please check with WB?
Note: In the past, I sent a list of earth stations to OET that are not in the list and later found out that the application was on hold for further considerations.

Thank you.

IB/SD has reviewed the subject request and proposes the following conditions:

() The stop buzzer:

() Prior to commencing any operations in the 3.7-3.8 GHz (space-Earth) frequency band, experimental licensee must notify licensees of earth stations. The notice must include the name and contact information of the stop buzzer personnel that will be available to cease operations in the event of reported interference. The notification should include the testing parameters (specific location(s), antenna gain(s), antenna height(s), antenna orientation, EIRP, EIRP density) and day and times of each test. Please notify the following licensees:

Call Sign: E140007
Frequency bands: 3.7-4.2 GHz

Licensee: KVH Industries, Inc.
ATTN: Ms Felise Feingold
Phone: 401-845-8148 Fax: 401-845-8116 E-Mail: ffeingold@kvh.com

Thanks,
Sylvia
