

#### **Exhibit 4 – Explanation of Amendment**

The application pending under File No. 1403-EX-ST-2022 has been amended to change 74.7 MHz to 75.5-75.9 MHz, in order to obtain approval for the required 40W Output Power and 40W ERP levels needed for this experiment.

- NTIA's Greg Melz has confirmed that NTIA coordination would not be required for 75.5-75.9 MHz.
- MAG/NTIA Coordination has already been completed for the frequency 233.2 MHz
