## **Application Narrative for Proposed Equipment**

### **Proposed Program**

Controlled Devices, Inc. is proposing GPS within their laboratory building for testing purposes.

### **Objectives**

We seek to accomplish the following objectives:

1. Illumination of the part of the lab facility, located at 1801 N. Juniper Ave, Broken Arrow, OK with a GPS signal to allow for the testing and experimentation of their pipeline pig location and tracking tools. These tools are used by our customers in the oil and gas industry along with other types of utility organizations.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information.
