

Autotel Race Radio
Application for Special Temporary Authority
File No. 1602-EX-ST-2022
WeatherTech Laguna Seca Raceway
Salinas, California

This application for Special Temporary Authority is submitted by Autotel Race Radio, a telecommunications company located in the United Kingdom. The application seeks five UHF channels for operational communications of one race team, United Autosports, which will have its pit crew and race cars participating in automobile racing events at the WeatherTech Laguna Seca Raceway at Salinas, California, from October 14-16, 2022.

These business and industrial channels have been reviewed against the Commission's ULS database and have been found to be unlikely to cause interference to any co-channel or adjacent channel licensee. Nevertheless, should any interference be reported to a licensee or authorized user during the race event, operation on the affected channel or channels will cease and will not resume on the offending channel unless and until all interference has been resolved to the satisfaction of the complainant.

The equipment to be used in each case includes Motorola DP3400 mobile and portable transceivers. The portables and mobiles will operate at 5 watts TPO and ERP. All emissions will be 11K2F3E.

The stop buzzer contact on site will be Paul Haigh, at +44 (0)7889 606 243. However, an additional or substitute stop buzzer contact in the United States will be undersigned counsel, who can be reached at any time during the operation by mobile telephone at 301-351-3795. All other communications can also be directed to undersigned counsel as follows:
