

On August 19, 2021, Alion was acquired by Huntington Ingalls Industries (HII) and became part of the Technical Solutions division.

Subject: FCC License Application

Reference: PWA Objectives

- Conduct studies and measurements to identify opportunities for early AWS-3 (i.e., 1755-1780 MHz) network deployment
- Through research and analysis, develop recommendations to enhance DoD's compliance with AWS-3 transition requirements
- Enhance the Government's ability to complete spectrum relocation, assess any potential sharing arrangements, and complete transitions without compromising operational capability
- Assess whether national and international regulatory, policy, legislative proposals, or executive orders negatively impact the Department's ability to meet national security and mission requirements
- Develop recommendations regarding the development of the DoD spectrum operations policies, doctrine, and systems collaboration with key military stakeholders to achieve Electromagnetic Spectrum (EMS) superiority over our adversaries
- Obtain spectrum certification and frequency assignments for all AF spectrum dependent systems
