Re: Narrative for File No. 0132-EX-CN-2023

January 23, 2023

Installation of Radio Access Network test base transceiver stations with 128TRX/256TRX radios in the lab and on the Nokia Cypress Waters campus roof for both indoor and outdoor over the air testing. This will be used for testing new RAN feature including L3 data calls, video calls, call performance, mobility, Multiuser Massive MIMO, Beam forming, RF coverage and cell performance, and Drive tests etc., Testing will done at both stationary locations and specific drive routes using mobile terminals and test devices.

Best regards,

Glenn A . Steitz
