

Regarding 47 CFR Part 5.302 Eligibility Requirements.

To Whom It May Concern:

Nalloy, LLC has experience in both creating radio products and also integrating radio products into existing equipment. Evidence of this fact can be demonstrated by review of several FCC Grants of Equipment Authorization issued pursuant to the FCC's radio product certification program under 47 CFR Part 2 Subpart J.

Experiments will be conducted within a specified controlled indoor location and accessed only by authorized persons. Regulatory compliance personnel are providing management and oversight to the experiments performed. While radio spectrum management expertise is available within the regulatory compliance group, Nalloy, LLC has also partnered with CKC Laboratories, INC. and CKC Certification Services, LLC (TCB US0103/NB0976) for supplemental assistance.

I hereby attest that the edibility requirements of FCC Part 5 Subpart E are met.
