

SANMINA®

# Sanmina SGS Fort Mill

Communications • Computing & Storage • Medical Systems • Defense & Aerospace • Multimedia • Clean Technology • Industrial • Automotive

## Application Narrative:

The GPS antenna + repeater will be used to increase the GPS signal strength in the test area inside a building to improve chances to acquire a GPS FIX by an electronic device. These devices use Unicon AM-17-A-B01 antenna module paired with Telit LE910C4-NFD Cell & GPS Radio module to acquire GPS signal. The GPS antenna + repeater is required by Sanmina to allow effective testing of the electronic devices for production/validation purpose of general assembly of the product.

What we make, makes a difference™
