EXTERNAL EMAIL:

Bob,

SBE coordination for this request has been successfully completed.

Regards,
RJ

Hi RJ:

No response and time is very short. Can you provide a concurrence on behalf of SBE?

Thanks,

Bob W

Hi Dan:

Do you need anything further from me?

Thanks,

Bob

EXTERNAL EMAIL:

Dan,

Let me know if you have any questions or if I can assist in anyway.

This is a demo of a possible new technology to be deployed at 2025-2110 MHz for broadcast use.

Thanks,
RJ

Subject: Request for coordination for demo at NAB Show (April 2023)

Hi Dan,

I'm writing to ask for your concurrence to test a low-power 5G-compatible ENG system **inside** the West Hall of the LVCC. Operation would be confined to one 2 GHz channel, which you can specify or we can select on-site. Bandwidth is 10 MHz. OFDM transmission. Transmitter power is 200 mW maximum, but would be limited to 20 mW or less. Antenna would be an omni ducky.

NAB has applied for an STA to cover this operation, but would like to provide an SBE coordination letter to the FCC. Attached is a copy of our application.

If this proposal is acceptable, please confirm by return email. I'm happy to answer any questions you may have.

Thank you for your consideration.

Bob.
