Travis,

Thank you for the update. There is no issue to remove 2290-2300MHz from the license.

Ryan

Hi Ryan,

NASA has objected to your requested of portion frequency band 2290-2300 Mhz. They are not allowed any airborne operation in this range. If you have any questions/concerns, you can contact them. I need to remove this band. So, your application can move forward.

Travis
