### **Application Narrative for Proposed Equipment**

#### **Proposed Program**

Raven Defense is a technology company based in Albuquerque, NM dedicated to providing high quality engineering services, expert program consultation, and highly specialized technical equipment to meet our customer's demanding requirements in satellite communications and ground stations, deployable sensors, and cutting-edge research, development, test and evaluation systems. We will be using the GPS repeater system to conduct R&D on our various GPS-enable mobile devices and software platforms. The repeater system will be an extremely valuable tool for developing new prototypes and improving functionality in the R&D process.
