

Summary of SpaceCap Updates

File # 0991-EX-ST-2023

- Started a new SpaceCap file, at request of International Bureau at FCC
- Included reference to "TMRWR1R2"
- Added RADR receive beam to receive transmitted signal from ground-based calibration system.
- Added RAD TEST earth station to identify the ground-based calibration system.
- Did not include any of the BR sections as requested with one exception regarding the Target NTC ID
- Included Target NTC ID to resolve the validation error, as per OET request on June 13, 2023

The non-fatal error that remains on this updated version is related to our selection of Short Duration Mission (SDM) when we are not using the either of the two frequency bands associated with SDM.
