

## **STA File Number 2378-EX-ST-2023 Supporting Documentation**

This application seeks approval for the use of additional spectrum in the 600MHz bands for the broadcast of New Year's Eve events in Times Square New York, NY from 12/27/2023 - 01/01/2024.

Applicant is a television producer providing audio and communication equipment for the filming of broadcast, satellite broadcast, and cablecast and other large-scale events. Applicant has a BAS license for this purpose, however, after consulting with local frequency coordinators, it is evident that the limited available BAS spectrum at this event makes it necessary to make coordinated, temporary use of additional spectrum in the 600MHz bands for the broadcast event.

Applicant will comply with the following conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth in the application.
- (2) Operation is subject to prior coordination with the local Society of Broadcast Engineers, Inc. (SBE) frequency coordinator.
- (3) Applicant is aware that other stations may be licensed on these frequencies and if any interference occurs, the applicant will be subject to immediate shut down.
- (4) Applicant must obtain consents from the Upper Microwave Flexible Use Service licensees in the proposed area prior to accessing to 614-698 MHz band.
