Request for OET Experimental License

Dear Sir:

On April 24, 2020, the FCC released a Report and Order and Future Notice of Proposed Rulemaking to expand unlicensed broadband operations into the 6GHz band, as a benefit to the public (FCC Record: FCC-20-51A1). Pursuant to said order, Spry Wireless Communications Inc. hereby requests an Experimental License in order to test available equipment within the U-NII-5 and U-NII-7 bands.

The experimental operations would involve field deployment and testing of Cambium Networks' 6GHz radio technology on two towers in the state of Texas. The radio's throughput capabilities would be tested in the U-NII-5 band and U-NII-7 bands using 80MHz-wide channels, across approximately eight access points and approximately 50 CPE total. The antenna gain of the Sector Antenna is 18dBi.

The antenna model for the CPE model is C5x. The antenna gain is 25 dBi.

Participants in the study will not be charged and equipment will be retrieved at the close of the study.

Spry Wireless Communications Inc.'s data collection program will operate without causing harmful interference to incumbent users. Spry Wireless Communications Inc. will work with any nearby licensed incumbent user that it identifies, based on data provided in the FCC's databases, to ensure that its operations will avoid harmful impact with such existing users.

If the Commission has any questions, please feel free to contact me at 312-841-9188.

Best Regards,

Liz Creekmore
