

File No. 0023-EX-CM-2019

QUESTION 4: Government Project Description

Space Exploration Technologies Corp. (“SpaceX”) is a U.S. space technology company headquartered in California, with additional launch and test facilities in Florida and Texas. The antenna installations included in this application will be used to perform radiofrequency (“RF”) testing in support of SpaceX’s Commercial Crew Transportation Contract and Commercial Resupply Services Contract with the National Aeronautics and Space Administration (“NASA”).

The specific event covered is the CREW-VE-106 verification event as specified in CCT-REQ-1130: ISS Crew Transportation Services Requirements, Revision D, Revision F, SSP 50808: ISS to COTS Interface Requirements Document.
