

Frequency or Location	Modifications Made	Reason for Change
KSC, FL: Mobile within integration facility X2 within 0.1 km, centered around NL 28-32-30; WL 80-40-11	Added this location	New additional integration testing location at Cape Canaveral
2216 MHz	1. Deleted emissions designator 2M73F1D and PCM FM 2. Deleted emissions designator 4M65F1D and PCM FM 3. Added emissions designator 2M69G1D and 3.45 Mbps 4. Added emissions designator 4M60G1D and 5.9 Mbps	Changed modulation rate for 2216 MHz from PCM FM to SOQPSK
2203.2 MHz	Added modulation rate 2.964 Mcps	Rate had not been previously included on license and was added for completeness
2287.5 MHz	Added modulation rate 3.078 Mcps	Rate had not been previously included on license and was added for completeness
2106.40625 MHz	Added modulation rate 3.078 Mcps	Rate had not been previously included on license and was added for completeness
2028.78 MHz	Added modulation rate 2.964 Mcps	Rate had not been previously included on license and was added for completeness
1575.42 MHz	Added modulation rate 1.023 Mbps	Rate had not been previously included on license and was added for completeness
