

Aerial Video Systems
Application for Special Temporary Authority
File Number 2207-EX-ST-2024
December 26, 2024 through January 1, 2025

Narrative Explanation of Operation

Aerial Video Systems (AVS), a subsidiary of NEP Broadcast Services, is a video production company which is engaged in video and audio production for television shows, sporting events and entertainment events. AVS has been retained for the fifth time to provide its services for a television program production in New York City, NY, Dick Clark's Rockin' Eve, in the vicinity of Times Square, New York. All video production events will be within 1 kilometer of coordinates 40°-45'-25" North, 73°-59'-09" West. AVS is a licensee in the Local Television Transmission Service and holds other licenses but the frequency bands authorized by those licenses do not permit sufficient bandwidth for video production given the location of this events in one of the heaviest ENG markets in the country, and given the bandwidth needed for these video production activities during the brief period December 26, 2024 through January 1, 2025. This same STA was applied for and granted in December of 2020 (See File No. 1841-EX-ST-2020); in December of 2021 (See, WT9XBF, File No.1884-EX-ST-2021) in December of 2022 (See WU9XPY, File No. 1939-EX-ST-2022) and in December of 2023 (See WW9XKJ, File No. 2167-EX-ST-2023). This application is identical to those granted STAs.

AVS intends to use at this production venue 8 RF cameras using a maximum of 250 milliwatts of transmitter power (and not more than 1W ERP) into an omnidirectional antenna using a 10M0FXW or 10M0D7W emission, in the band 3300-3400 MHz. AVS has no long term interest in this band. It is developing equipment that could ultimately be used in the General Access portion of the CBRS band at 3650-3700 MHz but that equipment is not now ready for deployment in accordance with Part 96 rules.

Video production will be terrestrial only, within the confines of the event venues. All operation will be under the direct control of Collin Hermes, an RF Technician with AVS, who will ensure against any interference to any other users of the same or adjacent bands at all times during any STA operation by AVS. AVS will protect any and all United States Government or Amateur Radio spectrum use prior to or during each of the the events, and should any interference arise, all AVS operation in this band will cease until resolved to the full satisfaction of the complainant. **The Stop Buzzer contact on site will be Mr. Collin Hermes, whose cell phone number is 818-312-2889.**
